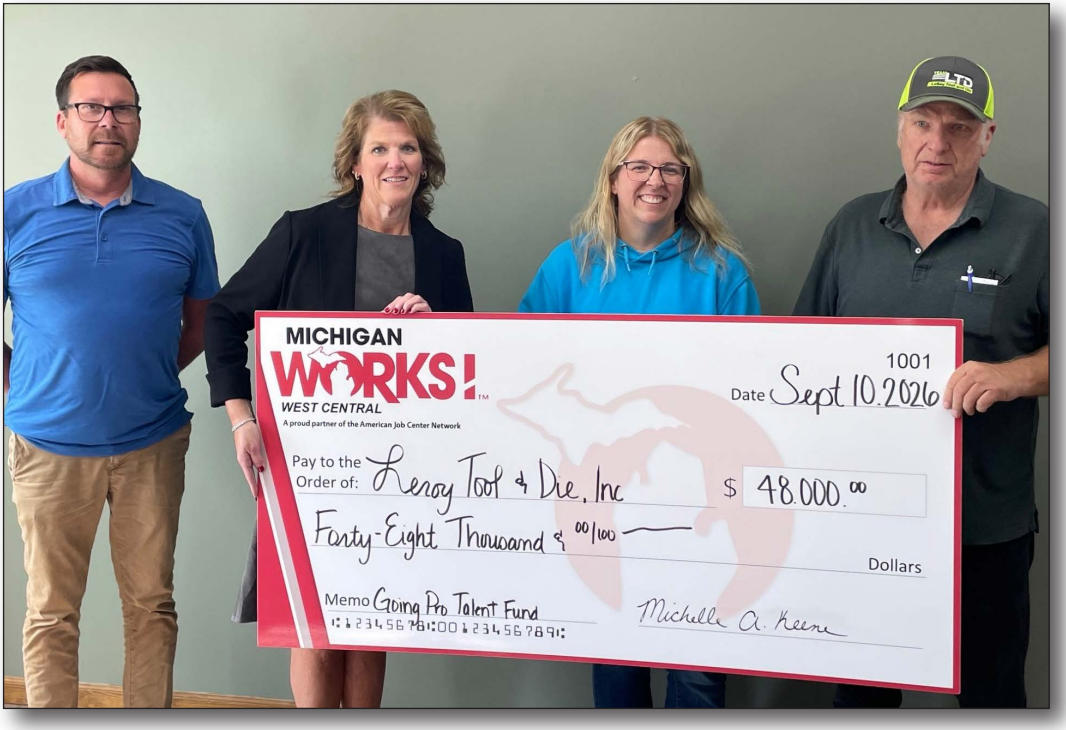
LEROY TOOL & DIE — Going PRO Talent Fund

As Leroy Tool & Die continues to grow in Osceola County, the company recognizes its success depends on having a highly skilled and adaptable workforce. Rapid expansion, the addition of new equipment, evolving production processes and employees stepping into leadership roles have created a need for advanced training across multiple departments.

To support these workforce development efforts, Leroy Tool & Die was awarded $48,000 through the Going PRO Talent Fund. The funding enabled the company to provide training opportunities for 24 employees, helping them build skills that support both individual career growth and the company's long-term success.

Employees participated in training focused on ISO 9001 Internal Auditing, Root Cause Analysis, Process Improvement and Workplace Safety. These courses provided valuable knowledge and practical tools that employees can apply directly to their daily responsibilities, helping improve efficiency, quality, problemsolving and overall workplace performance.



By investing in its workforce, Leroy Tool & Die is preparing employees to successfully adapt to new technologies, equipment and operational demands while strengthening leadership capabilities throughout the organization. The training also supports the company's commitment to continuous improvement and maintaining high standards of quality and safety.

The impact of the training has been significant. Company leadership expressed strong appreciation for both the Going PRO Talent Fund opportunity and the positive outcomes achieved through the training.

The company extended its sincere thanks to Michigan Works! West Central for helping make the investment possible.
