### 12V JUMP STARTER

- 1700 Peak Amps
- 2.4 Amp USB Power Supply 46' Cables
- #2 AWG Output Cables
- Meet Energy Efficiency Requirements
- LED Status Display
- On/Off Switch
- Built-in Charger

## CHT CCWC12V40A

**$379.00**

### 12V WHEELED CHARGER

- Advanced, microprocessor controlled charging24V, 20/10A Charge
- Versatile battery compatibility
- Engine Start Assist mode for 12V systems
- Power Supply Mode offers 0-60A output (12V and 24V models available)
- Fully automatic charging
- Temperature compensation

## CHT C7916420

**$199.99**

### 3.5 TON HYDRAULIC FLOOR JACK

- Low-profile frame for access under vehicles with low ground clearance.
- Long lift arm for superior reach.
- Front wheel design reduces rolling resistance.
- Two-piece handle with a rubber insert pad to protect vehicle components.

**$79.99 /each**

# FASTER BAYS, FEWER COMEBACKS, GETTING NEW HIRES BILLABLE IN WEEKS

The technician shortage continues to challenge shops across the country. According to the TechForce Foundation, over 750,000 new technicians are needed by 2028. Shop owners are not just looking for additional staff. They need technicians who can become productive quickly and continue developing their skills over time.

The groundbreaking NAPA XcceleratoR Program was developed with that reality in mind and is the first of its kind in the automotive industry.

Created in partnership with Skillmaker AI, XcceleratoR is an immersive training platform designed to shorten the time it takes to develop capable, confident technicians. By combining structured digital learning with hands-on virtual reality simulations, the program allows technicians to gain practical, scenario-based experience in a controlled environment. Instead of waiting months or years to encounter certain repairs in the shop, trainees can work through realistic diagnostic and service procedures repeatedly, building skill and confidence at a much faster pace.

NAPA XcceleratoR

A key development for the program is its recognition by ASE as a valid pathway toward meeting work experience requirements. This is significant for the industry. Traditionally, technicians must accumulate in most cases two years of on-the-job experience before qualifying to take the ASE certification tests. With XcceleratoR now recognized as part of that pathway, technicians can begin satisfying the core 30% of training experience requirements in just 25 days. That alignment between training and credentialing helps reduce the overall time required to move from entry-level to ASE-certified professional.

For shop owners, this represents a measurable advantage. It means new hires can progress toward certification sooner, contribute more confidently in the service bay, and reach higher levels of responsibility in less time. The program effectively bridges the gap between classroom learning and real-world production work. XcceleratoR also supports better hiring decisions by allowing shops to evaluate a candidate's technical knowledge during the interview process in a simple 45-minute assessment. This added visibility helps reduce uncertainty and ensures technicians are placed in roles that match their current skill level.

Beyond training, the smart glasses included in the package deliver everyday value in the bay. Technicians get hands-free, voice-driven access to trusted repair guidance built on the NAPA knowledge library and vehicle-specific data from Identifix and Autovitals right at the vehicle. Instead of stopping to track down a senior tech or walk to a workstation, a technician can ask a question and get clear, step-by-step direction while keeping both hands on the job, so work moves faster and gets done right the first time.

Addressing the technician shortage requires more than recruitment efforts alone. It requires accelerating development without sacrificing quality. By aligning immersive training with recognized certification pathways, the NAPA XcceleratoR Program helps shorten the road to competence, productivity, and professional credentials. The complete product launch is in November; to learn more scan the QR code below.

### OIL DRAIN PLUG AND GASKETS TECH TRAY (23 SKUS / 79 PIECES)

Our Engine Oil Drain Plug Assortment contains the most popular oil drain plugs. Many styles are offered, including Pilot Point, Universal and Differential. Replacement is essential during routine vehicle oil changes.

**NOE 821-5527-1**
Universal

**NOE 926-611**
Genesis G80 2020-17, Hyundai Genesis 2016, Hyundai 2024-20, Kia Cadenza 2020-17, Sedona 2021-19, Sorento 2020-19, Telluride 2024-20

### OIL FILTER ADAPTER

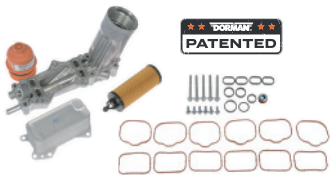
OE FIX

The oil filter adapter on some vehicles can leak as its plastic housing warps from heat and chemical exposure, sometimes cracking during routine oil changes. Replacing it with another OEM unit can lead to repeat failures. This Dorman® OE FIX® housing is made entirely of aluminum for greater durability and long-term leak prevention, and includes mounting gaskets for a complete repair.

### UPGRADED ALUMINUM ENGINE OIL FILTER HOUSING WITH OIL COOLER AND FILTER

OE FIX

The oil filter adapter on millions of Chrysler, Dodge, Jeep and Ram V6 vehicles can leak when its plastic housing warps or cracks from heat and chemical exposure, or even during routine oil changes. Replacing it with another OEM unit can lead to the same failure. This patented Dorman® OE FIX® housing is made of durable aluminum for long-term leak prevention and includes all necessary gaskets, plus a new oil cooler, filter element and cap for a complete, updated repair.



**NOE 926-959**
Chrysler 2025-11, Dodge 2025-11, Jeep 2025-11, Ram 2025-12, Volkswagen 2014-11

**NOE 264-791**
Ford F-150 2017-15

**NOE 264-792**
Ford F-150 2024-18

### ENGINE OIL PAN

OE FIX

The plastic lower half of the OE two-piece oil pan on certain Ford F-150s can warp or crack, causing leaks. Replacing it with another plastic unit risks repeat failure and requires heavy sealant with long cure times. These Dorman® OE FIX® pans replace the failure-prone OE design with durable diecast aluminum for improved resistance to heat and impact. They use a replaceable press-in gasket with minimal sealant for faster, reliable installation, and include a magnetic drain plug to help protect the engine.
