Oklahoma Mobility Management Program

Mobility Management is a Federal Transit Administration (FTA)-funded program that focuses on meeting community transportation needs through the coordinated use of a wide range of transportation providers and services. The program works to improve access to transportation for people who may face mobility challenges.

INDIVIDUALS- Connect with your local Mobility Manager or Navigator for personalized assistance in identifying transportation options and overcoming mobility challenges.

AGENCIES/ORGANIZATIONS- Engage with the Mobility Management program by sharing unmet transportation needs, participating in regional coordination meetings, and inviting a Mobility Manager or Navigator to learn more about your services. Collaboration across partners helps develop effective, community-based transportation solutions.

Mobility management networks are designed to improve the overall mobility for individuals, regardless of the rider characteristics, mode, or geography.
