

Blumcraft® 

SPEC  
BECOMES  
SPECTACULAR

At CRL, our purpose is to elevate architectural metal and glass to their highest forms of expression. To meld the latest technologies with a deeper sense of craft. To challenge the existing standards of design and fabrication – combining beauty with safety, innovation with longevity, the timeless and the futuristic. For over 50 years, our Blumcraft® brand has been the unquestioned spec of visionary builders around the world.

# METICULOUS

# MAGICAL

Flawless work has a demanding set of expectations. It requires precision, attention to detail, and the finest materials, handled with extreme craftsmanship. A single millimeter is gigantic because often it's the distance between perfection and imperfection.

This is what separates the ordinary from the truly magical. It's how a physical space becomes an emotional and memorable experience.

## PRECISION

Advanced CNC machining is employed to cut exact chambers in panic device tubes where component parts such as locking mechanisms and latches are inserted.

# ARTISAN

# ENGINEERED

From design studio to fabrication, a sense of craft is what distinguishes Blumcraft from the rest. Our teams have detailed knowledge and expertise acquired over decades. Metallurgy, engineering, and 3D modeling are all put at the service of the artisan. There's a higher level of care and a personal touch to everything we do.

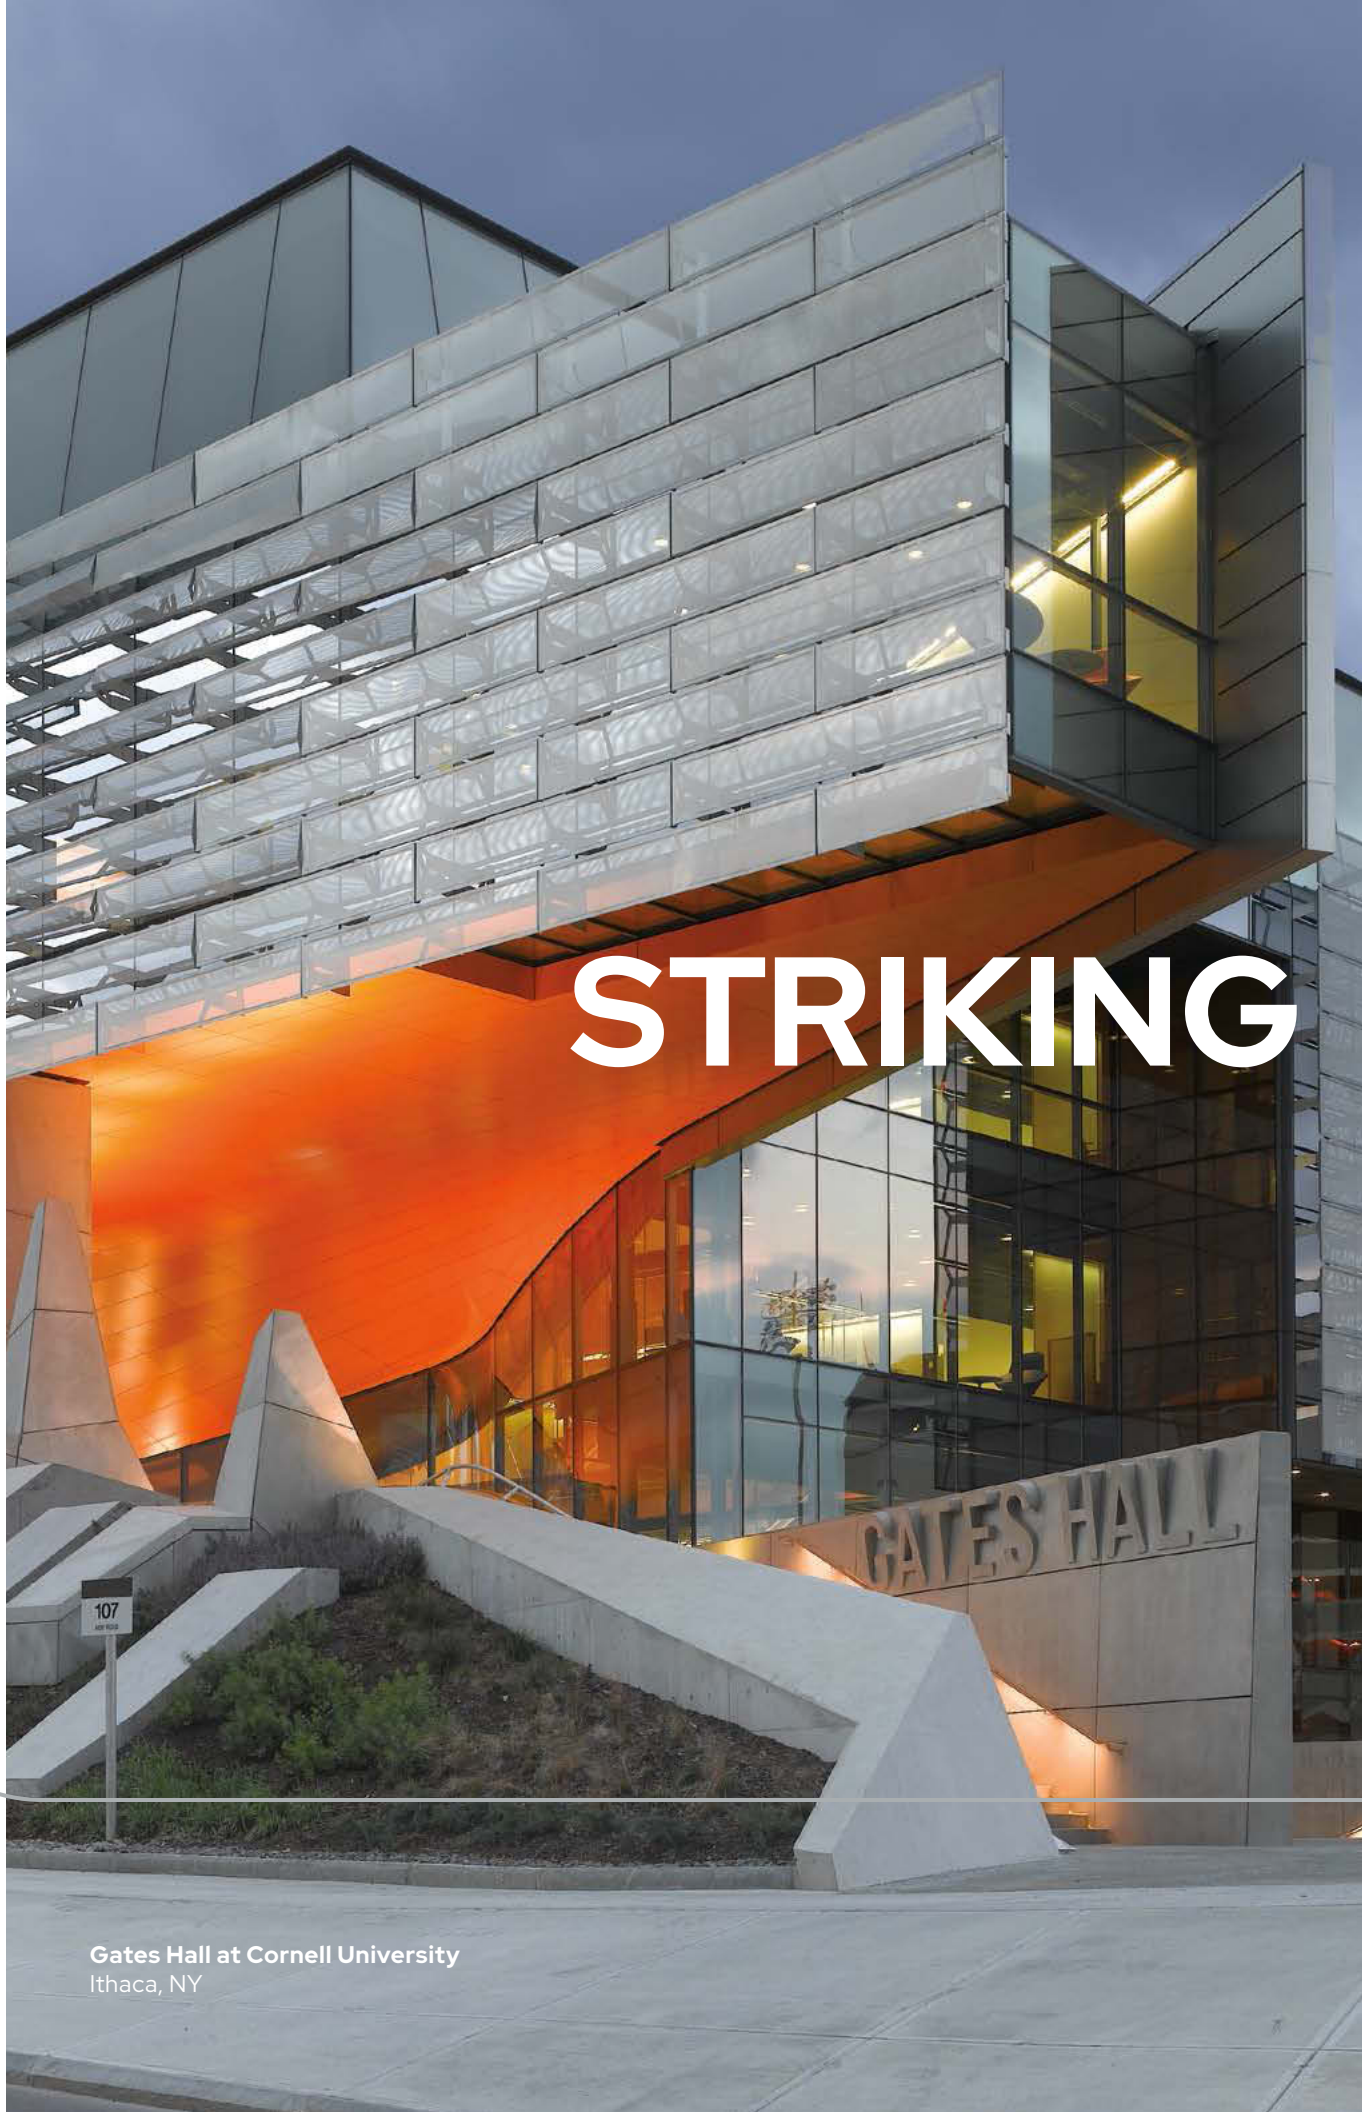

## CRAFT

Our tubular panic devices are diligently finished so they're soft to the touch. They're purposefully designed with a slim 1-1/4" diameter so they nestle comfortably in the hand, creating an instant human connection to the building.

**Colby College  
Athletics Center**  
Waterville, ME

# STRIKING

A beautiful, illuminated handrail that holds everyone's attention. A glass entryway that seems almost invisible yet is clearly eye-catching. Striking enclosures that help define the experience of the physical space.

Even a simple mounting mechanism is an opportunity to surprise. You'll find Blumcraft in many famous buildings thanks to a singular ability to blend in and stand out.

# SERENE

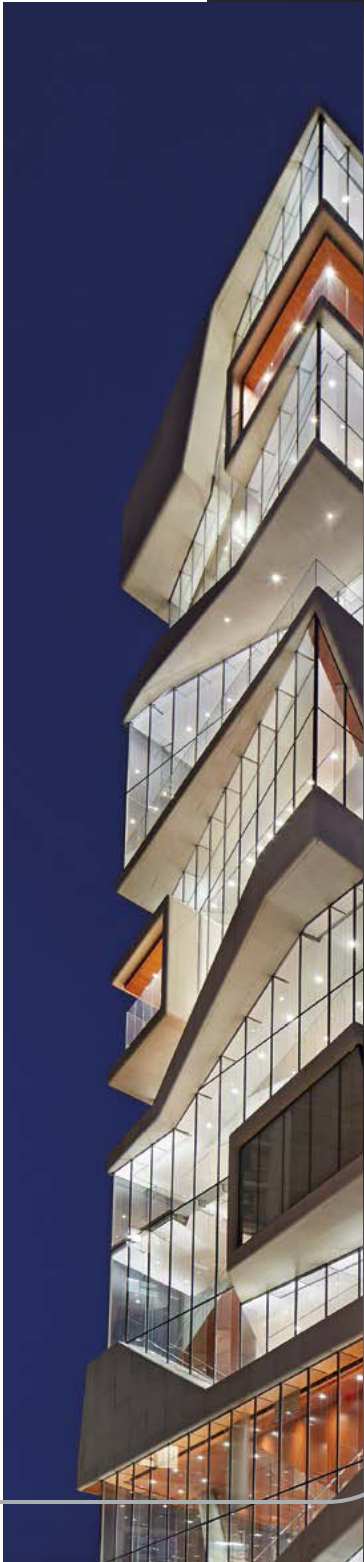

## BEAUTY

Entice Series Doors utilize precision-engineered through-glass fittings to mount handle hardware onto dual-glazed insulating glass, creating an alluring floating on air appearance.

**777 Aviation**  
El Segundo, CA

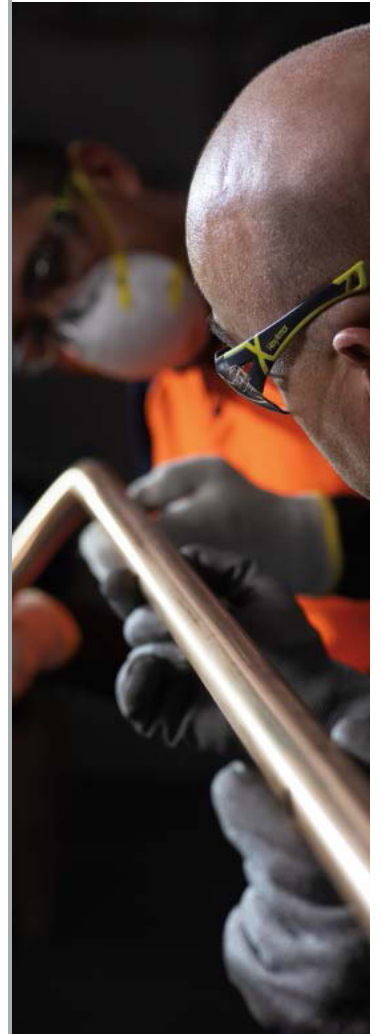

# INVENTIVE

Our partnerships with renowned architects and engineers have taught us invaluable lessons. There is no innovation without durability, resilience, an imperviousness to demanding conditions and environments. From our original panic devices to our new thermal entrance systems, every piece of steel tubing, door rail, and hardware is designed for endurance. Invention requires staying power.

**Vagelos Education Center**  
New York, NY

# INVINCIBLE

## DURABILITY

Our Balanced Doors perform under the harshest environments by utilizing positive and negative wind pressures to effectively distribute the door weight. This produces unsurpassed longevity and lasting beauty.

# ORIGINAL

**One Hundred  
Residential Tower**  
St. Louis, MO

The archetypal, the singular, and the distinctive.  
We believe there's a recognizable character to  
Blumcraft that defies any works of imitation.  
We have always strived to be the first and to  
reset the standards for what's possible in the  
industry. It's what makes us unique that leads  
to a performance that's exceptional.

# EXCEPTIONAL

## PIONEERING

Blumcraft patented the original tubular panic device over 50 years ago. Today, we're the first to engineer a panic device for monumental 12-foot glass doors, another industry innovation.

# THE ARCHITECTURE OF EMOTION

It's been said that we shape our buildings and then they shape us. People become inspired, delighted, comforted and energized. We help create these dynamic spaces that bring physical form and feelings together.

**Vagelos Education Center**  
New York, NY

**One Hundred Residential Tower**  
St. Louis, MO

**Microsoft Excellence Center**  
Vancouver, British Columbia, CAN

**Louisiana Sports Hall of Fame**  
Natchitoches, LA

**Holocaust Museum**  
Los Angeles, CA

**Gates Hall at Cornell University**  
Ithaca, NY

**Banc of California Stadium**  
Los Angeles, CA

## PANIC DEVICES AND DOOR HANDLES

We fabricate a complete line of panic devices and handle hardware designed for a variety of doors. These elegant systems give you maximum viewing area and a contemporary look, while remaining ADA compliant.

- PA100 Tubular Panic Devices
- PA300 Panic Device
- Designer Series Panic Device
- BP100 Panic Device for Balanced Doors
- Deadbolt Handles
- Electronic Egress Control Handles
- Dummy Handles

PA100 Panic Device

## GLASS ENTRANCE SYSTEMS

Our all-glass entrances and thermal doors represent the state-of-the-art in performance, durability, and aesthetics. They are the culmination of our knowledge, expertise and design ethos.

- Entice Series Thermal Doors
- 1301 Series Entrance System
- 150 and 250 Series Doors
- Balanced Doors
- Floating Door Headers

1301 Series Entrance System

## ADDITIONAL PRODUCTS

Blumcraft offers a selection of architectural hardware that's held to the same standards of artisanship, engineering, and beauty.

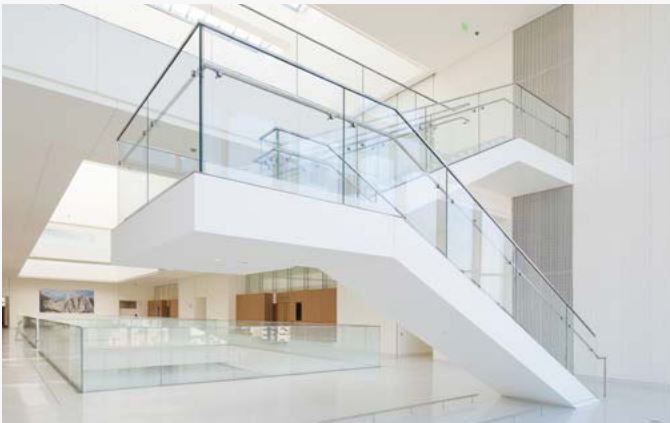

- Display Cases
- Gate Systems
- Glass Channels

## RAILING SYSTEMS

Merging clean sightlines with durability, our glass railing systems offer exquisite looks while meeting code requirements for safety and performance.

- Base Shoes
- Handrails
- Cap Rails

## BENCHMARKS FOR THE FUTURE

CRL has established a reputation for unmatched design, elevated performance and safety. Architects behind many of the world's most iconic and memorable buildings insist on Blumcraft®. So we'll continue to look at innovative new ways to transform glass and metal. Pioneers all share the same characteristic: they never stop exploring.
