About Us

Crusher Screen Sales & Hire is an Australian-owned company specialising in the sale, hire, and contract operation of mobile crushing, screening, blending equipment and concrete plants.

Operating from Yatala, Queensland, CSSH delivers equipment and project solutions across Australia, supporting major infrastructure, quarrying, mining, and civil construction projects.

As the authorised Australian distributor for IMS, Nordmann, Kreat and Semix, CSSH provides direct access to global OEM equipment, backed by local expertise and support.

We offer a fully integrated service model - from outright equipment sales through to short and long-term dry hire, wet hire with operators and fitters, and full-service contract crushing, screening, blending, and soil remediation.

Equipment Hire

Wet or Dry Hire

CSSH maintains a fleet of modern, low-hour processing plant available for deployment across Australia. Whether you need a single machine for a short-term site task or a complete mobile processing setup for an extended project, our hire division offers flexible arrangements - dry hire, wet hire (with qualified operator), and full contract - backed by our nationwide service and support network.

Full-Service
Turnkey Solutions

CSSH offers full-service mobile contract crushing, screening, and pugmill blending operations - providing all plant, qualified operators, consumables, maintenance, and production reporting to deliver processed material that meets your project's technical specifications.

Our contract operations division has an established and growing track record on some of Australia's most significant road and infrastructure projects. We bring the depth of plant and people required to sustain high-volume, continuous operations - whether the engagement runs for months or years.

- Jaw Crusher – 15 to 75 tonne
- Cone Crusher HP300 and HP400 size with recycling screen
- Impact Crusher with recycling screens
- Scalping Screens – 10x4 to 20x6
- Aggregates Screens incline and horizontal – 14x5 to 22x6
- Support Plant, Loader, Excavators and Conveyors

IMS Pugmills and Blenders offer high production up to 500 tonnes per hour, fully automated blending multiple raw material, and powers in one process

Soil Remediation

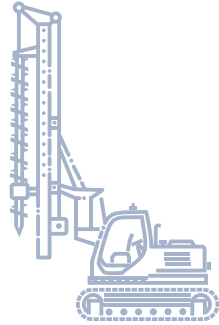

Contract, Purchase or Hire Options

CSSH offers specialised plant and full-service contracts for soil remediation and material stabilisation - providing sale, dry hire, wet hire, and complete contract services to environmental consultants, civil contractors, developers, and government clients.

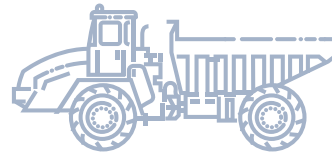

Our soil remediation capability is built on the same technology platform as our pugmill blending operations - purpose-configured for the specific challenges of remediation work: variable material characteristics, tight blend accuracy requirements, comprehensive batch recording, and the need to handle difficult, clay-rich, or contaminated soils.
