# Mail Sortation Systems

NOVAK®

INDUSTRIAL KINETICS, INC.

# Automate the Sortation of Incoming and Interoffice Mail

## The Novak® Sorter Automates the Pigeonhole Method of Sorting Mixed Mail

**The versatile Novak Sorter by TransLogic:**

- Sorts random size and shape mail up to 12"x15"
- Sorts mail and parcels up to 1" thick
- Requires no pre-handling, i.e. manual bar code encoding or facing
- Is not limited by address location... hand written or typed
- Sorts directly to tote boxes, bags and/or custom containers

The Novak Sorter brings increased efficiency to your mail distribution.

Operator Feed Station.

Labels identify each slot and are easily changed between sorts. Optional piece counters record incoming mail volume.

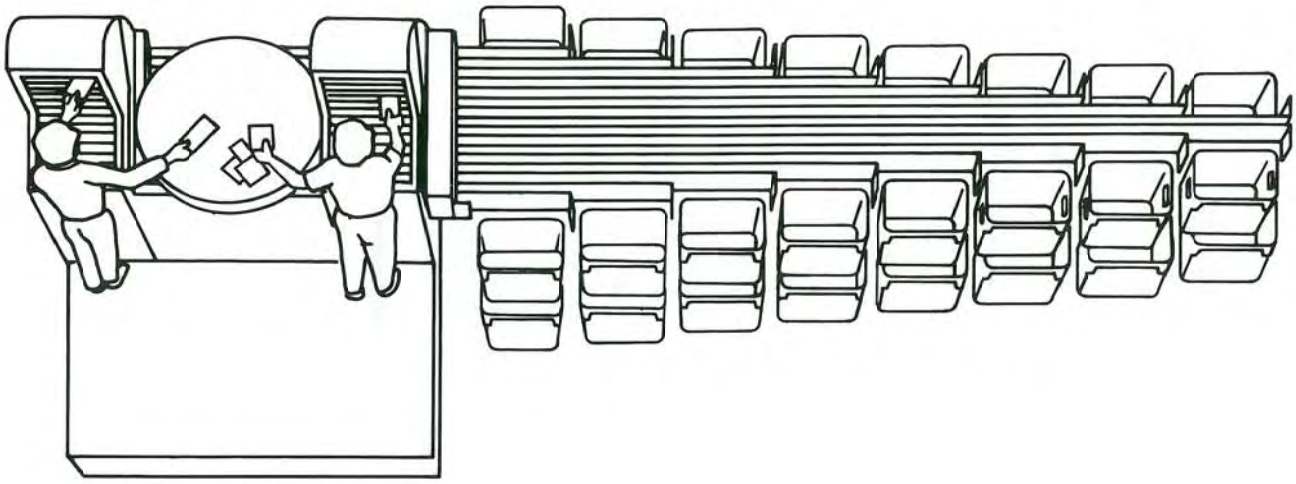
Rotary Sort Table.

Sort directly into the delivery container.

Double Decked Tote.

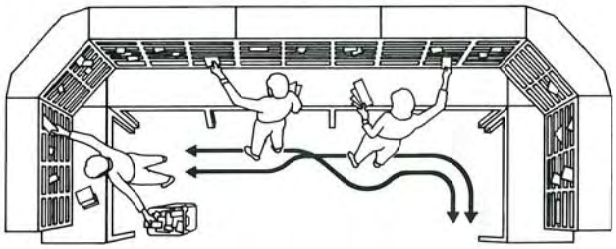
Mail Bag Stand.

# Sort 100% of Your Incoming and Interoffice Mail in 50% of the Time



With the Novak Sorter, operators sort while standing in one position.

**The Novak Sorter Automates The Traditional Pigeonhole Method of Sorting Mail.**



Eliminate wasted motion associated with traditional sorting methods.

Personnel stand in one place while sorting, improving speed and accuracy.

Interference is eliminated. Each operator sorts to a dedicated set of slots...but a common set of bins.

Mail and parcels are sorted directly to the delivery container, no need to transfer from pigeonholes.

**Enhance Mail Center Efficiency**

- Absorb growing mail volume without adding personnel
- Weather downsizing without compromising service
- Improve mail center image and morale

**Improve Service to Customers**

- Provide more frequent deliveries
- Deliver earlier

**Automation with Simplicity**

- Reliable proven technology
- Minimal Operator training
- No service contract needed
- Silent running

**Custom Designed**

- Quantities of operator feed stations and drops tailored to your operation
- Custom configured to your space requirements
