VORKIL STORY

DEFEND YOUR SAFETY

Vorkil® was established in 2020 with a team boasting decades of experience manufacturing safety products. Our safety products can be designed to meet the unique needs of different work environments and industries. We're proud to be the choice PPE manufacturor for many industrial companies in industries such as oil and gas, manufacturing, construction, healthcare, corporate and other sectors. Our focus on design and safety makes us a great choice for any growing company's PPE needs, helping to defend your team on the job.

GLOBALLY MINDED

We use the most high-tech factories in the world to help defend your safety. Our products are rigorously tested to ensure that they meet the strictest safety standards. Our products are designed to look good and protect workers.

Through our diverse supply chain of international manufacturors we select the very best who are specialized in producing specific PPE products. All of the **Vorkil®** manufacturing partners are carefully vetted and selected.

TECHNOLOGY DRIVEN

We are on the cutting edge of new materials in the PPE sector. Our products are carefully designed using a diverse selection of yarns, fabrics and protective garments. Our products come with a variety of features such as high-visilbility, flame retardance, arc flash protection, weather protection, cut resistance and other design features to help defend workers all over the globe. We are committed to providing our customers with the highest quality safety gear available.

WE'RE REVOLUTIONIZING workplace safety with cutting-edge safety gear that seamlessly integrates innovative technologies.

ADVANCED MATERIAL SCIENCE

Lightweight, high-performance engineered yarns for enhanced protection and comfort

SUSTAINABLE MANUFACTURING

Eco-friendly raw materials, harmless dyeing methods, and high-tech waste management systems that minimize environmental impact.

AI-DRIVEN DESIGN

Artificial intelligence tools that optimize product design, ensuring precision, efficiency, and innovation.

ROBOTICS AND AUTOMATION

Consistent quality control and precision manufacturing through state-of-the-art robotics.

DIGITAL TRANSFORMATION

Integration of the latest technologies to create a safer, more efficient workplace.

VORKIL MISSION

EMPOWER WORKERS with the most advanced, sustainable, and effective safety gear, setting a new standard for workplace safety and protection.

VORKIL STANDARDS

REACH COMPLIANCE

All components and ingredients used in the manufacturing and construction of Vorkil Safety products have been assessed and comply with the REACH European Legislation EC#1907/2006 (Registration, Evaluation, Authorisation and Restriction of Chemicals) another commitment to ensuring all our products are "skin friendly".

OEKO-TEX STANDARD

Oeko-Tex is the global testing and certification body for the textile industry. A number of our gloves have been tested for harmful substances thus enabling us to guarantee safe and skin friendly gloves.

SANITIZED

The Sanitized' (triclosan free) hygiene function is integrated into all Vorkil Safety gloves. The Sanitized (triclosan free) provides freshness, comfort and protection Sanitized (triclosan free) acts like a built-in deodorant that keeps clothing fresh for longer time and leaves you feeling safe and protected.

ENVIRONMENTALLY FRIENDLY

We are an environmentally friendly company operating in a responsible manner without compromising quality or the experience whilst reducing operating costs, We increase business product eco-efficiency through the use of envronmentally responsible design, technology, reuse and recyclable materials.

MAKING SAFETY SUSTAINABLE

SUSTAINABILITY

At VORKIL Safety, we are committed to minimizing the impact of our business operations on the planet, from the energy we consume to the resources and materials we use.

• Backed by data and independent audits, you can be assured that VORKIL Safety's social, environmental, economic policies and strategies will provide you with products and a service that complies with the latest in environmental legislation, ethical labour management and consistency in quality and sourcing for your portfolio.

• With state-of-the-art manufacturing globally, VORKIL Safety is working hard to incorporate industry leading measures to reduce our impact on the environment through carbon emissions reduction initiatives, managing water usage throughout our process and reducing our waste. All this together will help ensure that you can promise the same to your customers.

STRIVING FOR THE FUTURE OF WORKER SAFETY

INNOVATION

• With our own innovation centre for yarn, textile and fabric development and another centre of development and testing of new materials, polymers and chemicals, we can bring our expertise in coatings, yarns, knitting and former technologies to your own unique hand protection and safety workwear products.

• Our continuous improvements in new product development and eco-friendly range of technologies and innovations means we can offer you the most innovative and up-to-date hand protection and safety wear technology.

SUCCESSFUL PEOPLE. ENGAGED WORKERS.

PEOPLE

• We believe that our people are our most important asset. We work tirelessly at the health, safety and wellbeing of our employees, their families and the communities in which they live.

• We also work tirelessly to ensure the ethical treatment and the cultural, race and gender diversity of those we employ, offering them the opportunity to improve themselves and the quality of our products and processes by extensive training and development.
