X-939 Intelligent Driving Calibration System

LAN 702050010
LAN 702050009 (LDW Only)

The X-939 Intelligent Driving Calibration System is designed to meet the growing demand for precise ADAS calibration and 4-wheel alignment in modern repair shops. As vehicles continue to evolve, accurate calibration and alignment are essential for both safety and performance.

- **Automatic ADAS calibration:** 4 high-resolution cameras and 4 high-precision motors can be used to complete ADAS alignment and parallelization
- **Target tracking and finding:** Supports automatic tracking and finding of targets by the camera.
- **Real-time self-calibration:** Real-time self-calibration between camera modules to adapt to automated movements.
- **Dual-screen streaming synchronization, two-way control:** Supports 24-inch high-definition display and 13.3-inch diagnostic tablet streaming synchronization, and two-way control, making operation more convenient.
- **High-precision motion control:** Equipped with 4 axial high-precision stepper motors to meet the automation of forward, backward, left, right, rotation and lifting movements.
- **Ground level compensation:** Calculate the vehicle's level performance through four camera modules, and adjust the pitch and roll knobs to meet ADAS calibration requirements.
- **Target distance measurement recognition:** No need for manual measurement, just place the distance measurement target to quickly complete the distance measurement.
