WELCOME

Honoring the life they lived

Choosing an urn is one of the most personal decisions you will make for someone you love. There is no wrong choice. The right urn is simply the one that feels like them.

Every urn in this book was chosen by our family for yours. Many are on display in our showroom, so you can see the finish and feel the weight before you decide. If you don't see what you're looking for, ask us. We can order almost anything.

Take your time. We're here to help, and there is never any pressure.

CHOOSING AN URN

1 Choose a style

Wood, metal, natural marble, enamel and ceramic art, or a sculpted tribute. Think about where it will rest: at home, in a niche, or in the ground.

2 Choose a size

A full-size urn holds about 200 cubic inches, enough for most adults. Keepsakes hold a small portion to share with family. Companion urns, made for two, are available on request.

3 Make it personal

Most urns can be engraved with a name, dates and a short verse. Some hold a photo or an emblem.

4 Share with family

Matching keepsakes let children and grandchildren each keep a portion close.

These prices are effective November 1, 2026, but are subject to change without notice.
Prices include the urn only. Engraving is priced separately unless noted. See our General Price List for all services.

Geowood

No two are ever the same.

Each Geowood urn is turned by hand by George, a master woodsmith with more than 40 years at the lathe. It is built from hundreds of small segments of California and exotic hardwoods, then polished to a deep, glassy shine.

The colors shift as you walk around it. Because every segment is set by hand, every Geowood is truly one of a kind.
