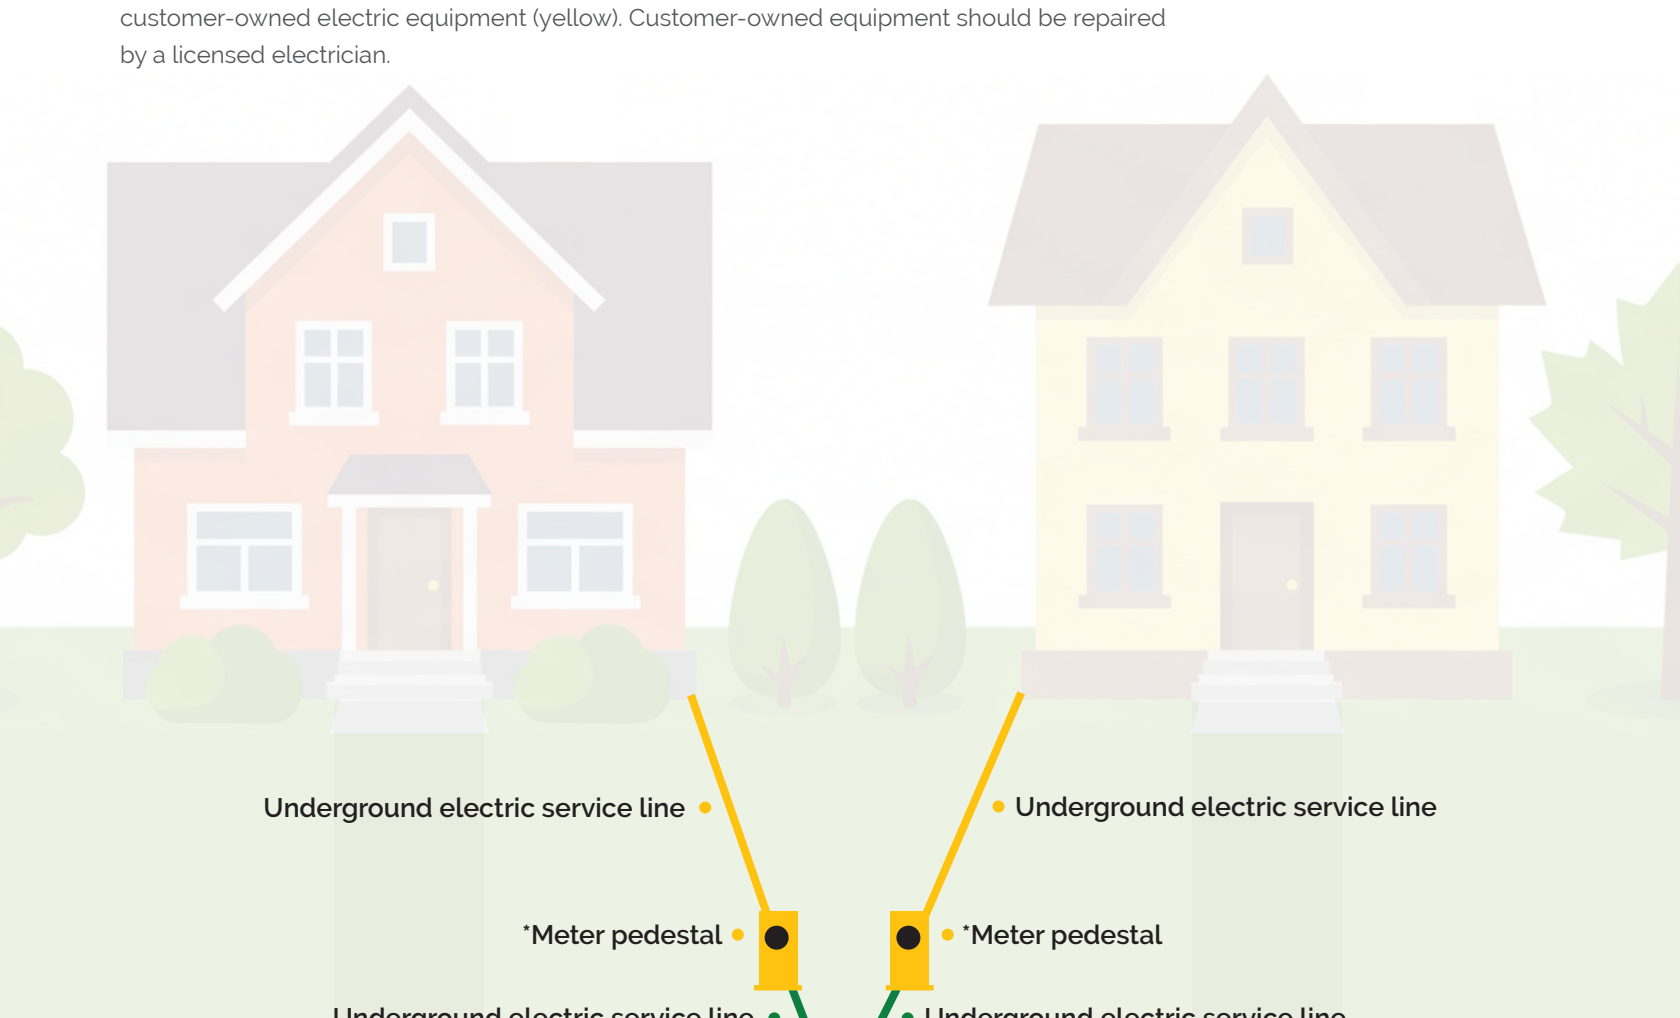
Elk River Municipal Utilities

RESIDENTIAL LOTS <50' WIDE
WHO OWNS WHAT?

Utility-Owned Equipment VS Residential Customer-Owned Equipment

- **ELECTRICAL** UTILITY OWNED
- **ELECTRICAL** CUSTOMER OWNED

The illustration below helps explain electric equipment ownership and responsibility regarding maintenance and repairs for residential lots that are less than 50 feet wide. The utility is responsible for utility-owned electric equipment (green), while customers are responsible for customer-owned electric equipment (yellow). Customer-owned equipment should be repaired by a licensed electrician.



**The meter pedestal must be located no more than six (6) feet behind the power source. For complete information, please review ERMU's Electric Department Rules at ERMUMN.com > About Us > Commission Info > Policies.*

This illustration depicts residential service for underground electric utilities. ***Please note that this illustration is not to scale.*** *Customers should contact us with specific questions.*
