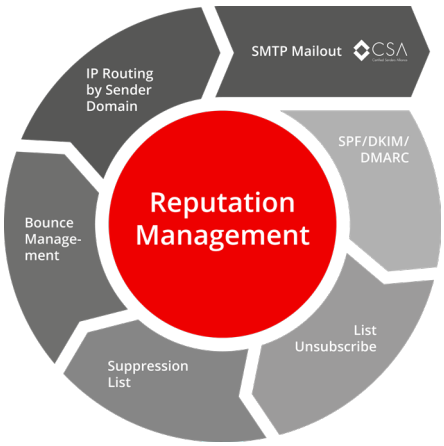
iDT

Reliability for your business processes

Our clients rely on Retarus for secure high-volume emailing to their end customers. If you're sending a large number of personalized invoices, notifications or delivery confirmations automatically from legacy ERP and eCommerce systems, you need an email solution that works for you. You can do it all from one singular place.



Unparalleled inbox placement (avg. sender score = 99, industry average is 85).

Dynamic IP routing according to sender domain, CSA certification, bounce management.

SPF, DKIM and DMARC implementation to maintain a high inbox placement.

Convey trust, confirm email authenticity, and increase email acceptance with Messaging Signing.

Why Companies Choose Retarus Transactional Email.

E-Mail transmission directly from business applications.

Connection via a REST API or SMTP adapter as needed.

Comprehensive consultation & support during all phases.

Assured transmission capacity of up to ten million emails per hour.

Status information for each email with Live Monitoring and Search.

Auditable infrastructure to ensure compliance and data protection.
