Educational assessment

An educational assessment examines academic skills such as reading, writing, spelling and mathematics, alongside learning behaviours and environmental factors that influence performance. It identifies barriers to learning and clarifies whether difficulties relate to a Specific Learning Disorder, such as dyslexia.

The findings help families, teachers and support teams put targeted adjustments, evidence-based interventions and personalised learning plans in place. We use the Wechsler cognitive scales (WISC for ages 6 to 16, WAIS for ages 16 to 90) and the Wechsler Individual Achievement Test (WIAT).

How it works

Step 1. Interview and testing

We email questionnaires to the parent or carer and teacher, or for adults, to you and a trusted adult. The interview explores academic background; children do not attend.

Step 2. Testing sessions

Two in-person sessions: up to 2 hours for the WISC or WAIS (puzzles, questions and thinking tasks) and up to 3 hours for the WIAT (reading, writing, spelling and maths).

Step 3. Report writing

A detailed report with the Full Scale IQ (FSIQ), academic results and recommendations. We will also diagnose any Specific Learning Disorder identified.

Step 4. Assessment handover

A feedback session to explain the findings and recommendations. NDIS reports are completed afterwards, if applicable.

Fees We will email you a quote when you request this assessment. You do not need to pay in full upfront; we book each step once payment for that step is received.

Consent to contact a teacher or trusted adult
We contact a teacher (for children) or a trusted adult (for adults) as part of the assessment, so we need your signed consent first.

Complete the consent form online →
Already sent us your New Client Form and consent form? Thank you, there's nothing more to do.
