Per un errore del softwar, così come evidenziato nal foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nal foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nal foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nal foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del software, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

Per un errore del softwar, così come evidenziato nel foglio collaudo, nella registrazione di Temperatura e velocità Ventola non viene registrato un decimale. Ovvero quando la tabella registra il valore di 100, in realtà il valore corretto è 10,00. Per ciò è stata aggiunta una tabella a quella acquisita in automatico, dove si evince il valore corretto.

PRESCRIZIONE 30 ALLEGATO TECNICO A:
30 c STATO DI COMPATTAZIONE DEL MATERIALE FILTRANTE

Monitoraggio 2020
Misurazione prescritta: Semestralmente

Nota dell'Arpa:
In riferimento alla nota prot. 017-165U/RIF 31.03.2017, con la quale venivano richiesti chiarimenti sulle metodiche da utilizzare per la misura del grado di compattazione del biofiltro (prescrizione n. 30 della DD Regione Puglia n. 13/15 di AIA), si ritiene che tale parametro possa essere determinato tramite la rilevazione della pressione dell'aria in mandata al biofiltro, fissando un limite soglia dell'incremento rispetto al valore misurato inizialmente con materiale fresco, al di sopra del quale porre in essere gli interventi di sostituzione (parziale o totale) del letto.

Data Sostituzione materiale Biofiltrante: 9-19/09/2016

Parametri di riferimento:
Data Misurazioni: 17/11/2016
Δ P (hPa): 1,4

Scelta: Si valuterà il rapporto, tra la perdita di carico misurata nella data più prossima alla sostituzione dell'intero letto biofiltrante, con quella fatta semestralmente. Se tale valore scendera la disotto di 0,5 si procederà a rivoltamento e integrazione, se scenderà al disotto di 0,2 si procederà alla sostituzione.
