Technical specifications and requirements

Act name:	The Wrong Brothers
Act description:	A walkabout act performed by two performers. The act contains clowning and physical comedy routines using the following wearable props: one mock airship on a wearable metal frame, and two pairs of wearable fabric wings. At no point do members of the public wear any of the props. During the wings routine, audience interaction includes inviting the public to jump up and down and flap their arms. The act is accompanied by recorded music played through a portable battery powered speaker.
Act performance style:	Walkabout/roaming
Act performance time/duration options:	One of the following performance formats: 4 x 20 mins per day 3 x 30 mins per day 2 x 45 mins per day Minimum of 40 minutes break required between performance sets
Get in time:	90 minutes minimum
Get out time:	60 minutes minimum
Performance area:	• Height clearance of 300cm and width of 250cm required • Outdoors, or indoors with good height clearance • A wide, unobstructed, pedestrianised area with high footfall is preferred. Ideally away from live music and staged performance • At particularly crowded events, a chaperone to be provided by the event to help maintain a safe distance
Surface and access:	• Firm, level ground. Hard standing preferred. Please advise in advance of cobbles, steep gradients, steps or soft ground, as these affect use of the airship frame.
Adverse weather:	• The airship prop cannot be used in inclement weather • The wings cannot be used in extreme inclement weather • The act cannot be performed outside in thunderstorms, constant high winds or heavy rain • Decisions to delay, change or cancel performances will be taken with the organiser where appropriate. Please consider adverse weather contingencies.
Sound:	• Low level recorded music from a portable battery powered speaker. No amplification or sound provision required from the event. Volume can be adjusted on request.
Power:	• No power required.
Changing area requirements:	• Secure ground floor changing area near the performance site • Minimum 3m x 3m x 3m, with double doors between the changing space and the performance area • Easy access to water and toilet facilities • Two chairs and one table
Loading/unloading:	• We will need to unload and load the van near the changing area.
Parking requirements:	• Parking space for 1 vehicle near performance area and changing area (provide by event).
People travelling:	• 2
