PALOS SOFA

PALOS SOFA

The design that surprises with its versatility is the central element of the Palos upholstered piece, a model inspired by the homonymous butterfly of unique beauty and considered the rarest in the world. Available with an island module, the sofa features the exclusive "one side" backrest movement system, which moves from the center to the edge of the seat and can be activated via touch or voice command. Other modules with fixed backrests can be combined to create an original decoration that adapts to what the moment requires.
