

NPAG Energy Network 2026

Be part of the network shaping a sustainable NHS energy future!

Meeting 1 of 4: Tuesday 13th January 2026, virtual via MS Teams

Why Join?

Be part of a national NHS network dedicated to turning insight into action on energy efficiency, compliance, and Net Zero delivery. The 2026 round will be delivered entirely virtually, featuring four facilitated meetings designed to support shared learning and practical outcomes.

Our members gain:

- Exclusive national insight – direct updates from NHS England on policy, standards, and funding.
- Proven solutions – tools, templates, and case studies ready to replicate in your Trust.
- Collaborative opportunities – joint procurement pilots, working groups, and peer support.
- Practical savings – case studies including kitchen energy trials achieving up to 40% reduction in use.

What Makes Us Unique!

The NPAG Energy Network is NHS-led and NHS-focused, designed around the real challenges of estates, energy, and sustainability teams. Members gain direct access to national decision-makers, including NHS England and Crown Commercial Service, and benefit from peer-driven solutions that are ready to replicate. Our cross-sector membership ensures a rich exchange of experience, while focused working groups drive practical progress on Energy Management Systems, kitchen energy, and pipeline planning. Every meeting delivers tangible outcomes – from energy savings in trials to investment-ready data dashboards.

Some of the benefit of NPAG, which you won't get from other groups, is the collaboration and problem sharing around NHS specific guidance. Among members, whilst often we're not in a position to change things nationally (especially when the rules are legislative), we have done things to work around the challenges and be able to progress.

Interested? Why not come and see for yourself! Try Before You Buy places are available.
