Zero Trust IoT SIM cards
secured by zscaler

ZERO TRUST IOT SIM CARD

Secured from the SIM, no software needed

All data traffic runs through the Zscaler Zero Trust platform.
No VPN or software on the device:
insert the SIM and you are ready.

EEA + UK
multiple networks

Zero Trust
by Zscaler

€0.79
per SIM per month

IOT AND M2M SIM CARD · DATA ONLY

Insert the SIM, secured instantly

€1.75
per SIM card, one-off, excl. VAT

1 Insert the SIM
In your router, EV charger, camera or sensor. Nothing needs to be installed.

2 Traffic via Zscaler
The mobile network sends all traffic to Zscaler, where your security policies apply.

3 Authorised access only
No access by default. Only connections you explicitly allow get through.

Transparent pricing

All costs at a glance · excl. VAT · no hidden costs

Subscription	Data	Zero Trust inspection	Private APN
€0.79	**€2.19**	**€7.95**	**€250**
per active SIM per month, incl. Zero Trust	per GB, EEA and UK, multiple networks per country	per GB of traffic inspected by Zscaler	per month per account, isolated from the internet and other customers

Example: a SIM using 100 MB per month, all via Zero Trust: €0.79 + €0.99 = **€1.78 per month**, plus the fixed account fee.

✓ No setup costs · ✓ Portal and support included · ✓ Data limit per SIM · ✓ No minimum order or contract term

Zero Trust
by Zscaler

Invisible
No routable network, so no attack surface

No VPN or software
Security sits in the network, not on the device

Full visibility
Activity and usage per SIM in one overview

Ideal for EV chargers · Vending machines · Kiosks and tablets · Machinery · Routers · Cameras
