The Growing Season

The 2023 harvest was a waiting game that ultimately rewarded patience.

A wet winter and spring delayed bud break, and cool early temperatures raised concerns. Some varieties experienced reduced pollination, resulting in smaller berries and lighter clusters. Although bloom conditions were challenging, moderate summer weather encouraged healthy berry growth and vine development, helping to balance the crop. Yields varied by site, with some blocks lighter and others more generous.

2023 SIMPATICA WHITE BLEND

Winemaker's Notes

A soft, delicious, very floral and fruity lower alcohol dessert wine that is packed with flavor.

Tasting Notes

Alluring aromas of apricot, wildflower honey, and soft floral notes lead to lush flavors of white peach and apricot in this delicately sweet blend of Riesling and Muscat Canelli.

Pairing Suggestions

Excellent as a sipping wine or paired with spicy Asian or Indian food, warm pastries or fresh fruit and cheese.
