KEY IID TERMS

Term	What it means
Alcohol	Any form of alcohol including, but not limited to, ethanol, methanol, propanol, and isopropanol
Alcohol setpoint	Concentration at which IID is set to lock a vehicle ignition.
IID	Acronym for breath alcohol ignition interlock device- also called device, IID, or interlock
Bogus sample	Human breath sample that has been altered, diluted, or filtered OR a non-human sample- an example of circumvention
Calibration	Processes to ensure breath alcohol result accuracy
Circumvention	Unauthorized, intentional act or attempt to start, drive, or operate IID-equipped vehicle without the driver providing all required breath samples. Includes allowing passenger to provide sample when offender is behind the wheel or failing to complete required service
Confirmation	Function to provide opportunity to avoid violation after a non-passing retest sample is provided. After a 2:00 wait, another retest is required, and that result will be either a pass or violation
Disconnection	Failing to reconnect handset before attempting to start vehicle
Permanent lockout	IID feature where vehicle will not start until device reset by service center
Prohibited alcohol concentration	If person is subject to interlock order, an alcohol concentration more than 0.02
Removal	IID is uninstalled from the vehicle before the order period has been fulfilled
Restart	Feature that allows a restart within 2 minutes without providing a breath sample if the most-recent retest sample result was pass
Retest	Breath samples requested within the first 5 minutes and at random 5–30-minute intervals for as long as the engine is running
Tampering	Unauthorized, intentional act or attempt to bypass, disable, disconnect, or remove IID from the power source
Violation	Confirmation retest sample result of either Fail (Abort), Fail (Above Setpoint) or Fail (Refusal)
Violation reset	Feature where IID activates a service reminder after: <ol style="list-style-type: none"> 1. 3 violations, or 2. Detection of tampering or circumvention attempt
