ENVIROKLEEN EXTRA

NON HAZARDOUS WATER BASED CONCRETE FLOOR, DRIVEWAYS and FOOTPATH CLEANER

ENVIROKLEEN **EXTRA** is a specially formulated floor cleaner for the speedy and convenient removal of a wide range of contaminants such as oil, grease, dirt and carbon deposits. ENVIROKLEEN **EXTRA** is powerful enough to remove the stubbornest stains in concrete floors, driveways and pathways with the smallest amount of effort.

ENVIROKLEEN **EXTRA** is non hazardous according to the criteria of Worksafe Australia, contains no solvents, silicates, hazardous alkaline salts, caustics, phosphates or nitrates. The surfactants used in ENVIROKLEEN **EXTRA** are fully biodegradable.

It is safe on all surfaces including reactive metals and can be used safely at recommended concentrations.

ENVIROKLEEN **EXTRA** is a pale yellow liquid, which is used through a wide range of industries. It does not harm surfaces such as glass or good paintwork.

The most common concentration is one part ENVIROKLEEN **EXTRA** to five parts water. For very light soils, up to 20 (twenty) parts of water dilution can be employed.

Prior to applying ENVIROKLEEN **EXTRA** wet area to be cleaned with water then apply made up solution by brush, mop or spray and allow a few minutes before brooming floor surface. For extremely tenacious soils, the product may be used undiluted. Allow solution to work on the floor for as long as possible.

The surface may then be hosed off to reveal your new floor.

ENVIROKLEEN **EXTRA** is a quick break formulation allowing it to be used where washdown treatment through coalescing plate separators and approved systems are in use.

Precautions

Avoid prolonged contact with skin, particularly with concentrated product as defatting of tissue may occur. If contact occurs, rinse off with copious quantities of water. Read Product Material Safety Data Sheets (MSDS) before use.
