

## Bungle Bungles & the Osmond Range : 18 April - 9 May 2026

**List price - \$9995      Special offer: \$2500 discount.**

For information about our advance purchase and other discounts, see our discount page, [www.bushwalkingholidays.com.au/discounts](http://www.bushwalkingholidays.com.au/discounts) and the additional information at the end of these notes.

**Summary.** This trip is divided into two very different sections: the Osmond Range and the Bungle Bungles. While they are within walking distance of each other, the two areas could hardly be more different.

The rocks in the Osmonds are harder and more angular than those in the Bungles. Most of the creeks are spring fed and flow well into the dry season. The vegetation the southernmost monsoon forest in the Kimberley. There are even a few small cycad groves.

The soft sandstone domes of the Bungles and the spectacular Piccaninny Gorge are the main attractions that gained its World Heritage status. None of the creeks flow all year, but we do find some permanent waterholes along the way.

Either section can be done on its own.

## Itinerary: Bungle Bungles & Osmond Range

**Note 1** Day 0 is the day before departure.

**Note 2      This itinerary is subject to change.**

Section 1      Bungle Bungles      List price \$4995

**18 April** Section one begins in Kununurra. There are daily air and bus services between Kununurra and Perth and Darwin. Connections to the eastern states are normally made through Darwin.

Pre-trip meeting 6.30 p.m., outdoor area, Kimberley Croc Motel. **This meeting is important.** If you cannot make the meeting, please advise us well in advance.

**19 April** Pick up between 7.00 and 7.30 a.m. Pick up is [campground with dozens of others?](#) as arranged at the pre-trip meeting. Drive to the Bungles Stop en route to buy cool drinks, etc.

**20-27 April** Bush camping. Carrying full packs on most days, day packs at other times, exploring gorges.

**28 April** Return to car. Drive to airstrip. Fly back to Kununurra for those finishing here. Fly to the Osmonds for those continuing. End of section 1.

Section 2 Osmond Range List Price: \$7295

**28 April** Those joining this are collected from their accommodation in Kununurra and taken out to meet us. Fly to the Osmond Range.

**29 Apr - 9 May** Bushwalking. Carrying full packs some days, day packs at other times.

**10 May** Return to vehicle. Drive back to Kununurra, arriving mid afternoon.

*Now for the details.*

View down one of the Osmond gorges to the distant ranges to the north.

Dawn at Bungles campsite. Where would you rather be – here with a small group or in a dusty campground with dozens of others?

## Section 1: Purnululu (Bungle Bungle) National Park: 18-27April

Looking down Piccaninny Gorge from near the top.

In mid 2003, Purnululu joined the list of Australia's World Heritage locations. Here's what the Department of Environment and Heritage has to say. "Famous for the 45 000 hectare Bungle Bungle Range, with its huge expanse of striking banded beehive structures, sandstone cliffs and towers, Purnululu has been listed as an outstanding landscape that is a superlative natural phenomenon, revealing the history of its formation over hundreds of millions of years. Purnululu National Park has such outstanding universal natural values that it enriches the world and should be conserved for the benefit of all people. Before 1982, when aerial pictures were first released, it was virtually unknown except to pastoralists, scientists and the local Aboriginal community. It is now seen as one of the scenic jewels of outback Australia."

There are many tours which will take you to Purnululu. A few will take you on a walk for a few days but **no other tour will allow you to experience as much of the park in as intimate a fashion as this.**

The start of our Bungles walks is at the end of a 4WD track about 10 kilometres from the Bungles airstrip.

The start of this walk is especially slow and easy as we stop and explore some of the small southern gorges along the way. Eventually we reach a base camp about 12–13 kilometres up Piccaninny Gorge, where sheer red cliffs are silhouetted against the clear blue skies of the dry season. Piccaninny is by far the largest gorge in the Bungles. We spend three or four nights there using the days to explore the many fascinating side gorges.

These gorges offer a variety of delights — some are palm filled, some are very narrow and require swimming, some have caves which require the use of a torch. There is at least one gorge that allows us to reach a high point. No words can do justice to the beauty of the area. The only way to appreciate it is to come and see it for yourself.

*We cannot climb to the actual top as climbing up the domes themselves is not permitted because of their exceptionally fragile nature. We can, however, follow watercourses as far as they will take us ... and that gets us some amazing views.*

We begin our return two or three days before the end, spending the final night only a few kilometres from the car. On the final day, we return to the vehicle and drive to the airstrip from where those doing only section one will be flown to Kununurra.

Getting into this beautiful little gorge requires a steep scramble up a dry creek bed.

### Terrain and difficulty

**Overall** Level 3

**Climate** As for section one.

**Terrain** **With packs - level 2:** flat, minimal rock hopping, some ledging, some soft sand. The walk up the Piccaninny Gorge, mainly over pebbles and sand can be quite tiring for many people. Going beyond our first base camp, done with full packs on some trips, requires some clambering over large rocks and includes edging along at least one narrow ledge.

**Daywalks without packs - level 4.** Most of the day walks involve clambering over large rocks. Some include steep climbs. Some people find this very difficult, even without full packs.

Although this difficulty is often more psychological than physical, it can be very real. The only reason this section is not rated "difficult" is that the hardest parts are done without full packs.

The climb up one of the gorges is particularly strenuous. Few groups have had every member go all the way. If you don't wish to do the rock scrambling, you need to be prepared

to relax and enjoy their surroundings while the others continue. Keen birdwatchers often find this especially pleasant. Some people become uncomfortable in the absence of the rest of the group. Please keep this in mind when choosing this trip.

<b>Vegetation</b>	With packs - level 1: minimal vegetation Without packs - level 2-4: some walks include dense sections of sharp and/or sticky spinifex, gaiters essential, long trousers recommended.
<b>Hours</b>	You normally walk 4-6 hours per day.
<b>Packs</b>	<b>Waterproofing.</b> We recommend you bring a garbage bag for waterproofing on the off chance that you might get some rain. There is also one spot where we sometimes float packs. <b>Pack weight:</b> level 4 = ten day's food, but you do not normally carry a full pack every day.
<b>Art:</b>	Two minor sites
<b>Campsites</b>	Mostly on sand, might include rock ledges on some nights. Rain rare but could cause change of site.
<b>Swims</b>	Normally fairly good. Depends very much on the just finished wet season. The water is warmer and there is more of it than on trips later in the year.
<b>Lowlights</b>	Helicopters intrusive most of day, aircraft early and late. Not as bad as later in the year.
<b>Highlights</b>	Incredible and spectacular gorge scenery, each one uniquely different from the others.
<b>Fishing</b>	No.
<b>Maps</b>	Kimberley Tourist map and the Bungle Bungle 1:50 000 topographic map.

Bungles swim

## Notes for Section 1

Those who wish to do a helicopter flight over the Bungles will have an opportunity to do so either on arrival or just before departure from the park. Which time we choose depends on when we arrive. At the time these notes were written, the prices were listed as \$349 for a 18 minute flight, \$539 for 30 minutes and \$629 for 42 minutes. For further information please see their website: [www.helispirit.com.au](http://www.helispirit.com.au).

All this area is a stove only area. Campfires are not permitted.

You will need to bring a small bag for toilet paper as neither burning nor burying are permitted. Or bring a squeeze bottle you can use to wash your bum.

Those continuing to section two will be able to leave their food for this section in the vehicle during the first walk. If someone is coming in for only section two, it **might** be possible to have a few fresh things brought in.

## Section 2: The Osmond Range: 27 April - 9 May

The 4WD tracks that would take us to the edge of the Osmond Range are rough at best, often still closed at this time of year. We plan to overcome this by flying in by helicopter from the Bungles airstrip. Anyone joining for this section will be flown in from Kununurra. Exactly where we land can vary from trip to trip, normally close to, but not right on, one of the many creeks. We are soon enjoying the first of our many swims.

Walking along the top of the plateau is mostly flat and fairly easy – a good way to get from one creek to the next. The creeks, with their waterfalls and gorges, are where the most spectacular scenery is.

Arriving in the Osmonds

Osmond swim

In some places we will have to scramble up steep slopes; in others the walking should be flat and easy. Sometimes we will drop our packs and do a day or half-day walk. At other times, we will carry the packs and shift camp from one creek to another.

The vegetation can change dramatically from year to year, so dramatically that the guide on one could scarcely recognise the areas that were described in our notes from three years earlier. It's been the same

on each trip since. The one constant is the lovely gorges, pools and waterfalls which make the Osmonds a special place. On the last day, a helicopter picks us up and we fly back to the Bungles airstrip, then drive to Kununurra.

Flat walking on the plateau

## Terrain and difficulty

### Overall

Level 3.

### Climate

This is a relatively hot time of year. The temperature will reach the low to mid 30's most days. Temperatures of 35°C are not uncommon. The heat reflecting back from the sand and rocks in some areas can make it feel hotter still. The humidity is normally relatively low so the heat will not feel as uncomfortable as it does during the wet season. Nighttime minimum temperatures average 18-20°C but can go down to about 10°C so you need to be prepared for cold nights. The pools, especially those which get some sun, are much more comfortable for swimming than they are later in the year. Although rain is unlikely, it is common enough so you should be prepared for a rainy day or two.

### Terrain

Level 2-4. Although some of the terrain is quite open and easy, much of the walking will be done in narrow gorges. There will be some clambering over large rocks and some edging along narrow ledges. There may also be one long and strenuous climb. There are steep sections as shown at right.

### Vegetation

Level 2-3. The vegetation can vary dramatically from year to year. We may encounter thick scrub and spinifex or there may be little thick vegetation to push through.

### Hours

You normally walk 4-6 hours per day.

### Packs

**Waterproofing.** We recommend you bring a garbage bag for waterproofing on the off chance that you might get some rain.

**Pack weight:** level 4 = ten day's food, but you do not normally carry a full pack every day.

### Art

None found to date.

### Campsites

Flat areas in the Osmonds tend to be small so some of our campsites are likely to be more crowded or more spread out than normal depending on how large and/or how far apart the tent sites are.

### Swims

Magnificent pools and flowing creeks.

### Lowlights

Steep climbs and thick spinifex (some years). Flies and cattle in the lowlands at the end.

### Highlights

Beautiful pools, gorges and waterfalls; expansive views out over the plains.

Look carefully and you can see the people walking down.

Osmond pool and cascade

<b>Fishing</b>	Possible, especially near the beginning and end. We had a couple of fresh fish meals on our first trip to the area.
<b>Maps</b>	Turkey Creek 1:100 000 or the Bungle Bungle and Texas Downs 1:50 000 topographic maps.

## Notes for Section 2

The few photos we can include here come nowhere near doing justice to the area, but they should give you a taste of what the trip is like. The videos on our trip web page do a much better job.

The difference in 2005 was even more dramatic than the one referred to in the notes above. With only one major rainfall during the wet season, the lovely pools and waterfalls which make the top of the Osmonds such a special place had dried up and almost disappeared. This was in stark contrast to our first trip which was in August, normally a much drier time. On the trips since 2008, it was back to normal.

Unlike the Bungles, this walk is in an area where campfires are permitted.

Those beginning leaving at the end of this section will probably be flown back to Kununurra from the Bungles. There is a small chance we will use a vehicle. We cannot be sure which transport we will use until we see how many are joining or leaving.

## Notes for Both Sections.

Bringing fresh fruit, vegetables or honey into WA is illegal whether you come by road or plane. (You cannot even bring in boxes or other containers that once contained fruit or vegetables.) Bags are checked both on the highway and at the airport. There will be time to do some shopping in Kununurra.

A day pack is useful on both sections of this trip. However, if you don't have a daypack, you can empty your main pack and carry that.

Those doing both sections of the trip have to carry only what they need on each section. Additional food and clothing can be left in the vehicle during the walks.

Both sections of this trip have been rated level three because of the day walks. If you had to carry a full pack every day, section one and possibly section two would rate as level four.

You should always keep a water bottle, your lunch and some money with you during the drives as you cannot easily get into your pack during the journey. You should have enough money to pay for your drinks at the stops.

**The flights for those doing only one section depend on bookings.** We may drive instead. We will not be certain until shortly before the trip.

If the track into the Bungles is closed as it was in 2011, we will have to fly in. That would increase the cost by at least \$300 per person. We cannot be sure of the exact additional cost until we know how many people there are and can get quotes. (To date, this has only happened once.)

We expect to have free transport available from Darwin to Kununurra the day before the trip begins and from Kununurra to Darwin the day after the trip ends.

It **might** be possible to fly out late on the day your trip finishes. Please do not book a connecting flight on the same day unless you have confirmed it with us beforehand.

**Air North**, <https://www.airnorth.com.au/>, and **Nexus** <https://nexusairlines.com.au> are the main airlines flying to Kununurra.

The prices on the map at right are out of date but it does show where we have our pre-trip meeting.

### **Special Discount Offer**

As of 9 January, we did not have quite enough bookings to run the trip so we decided to try a special discount to see if we could get the last two bookings we need.

**\$2500 discount** off the list price for the full trip.

**\$1000 discount** off the list price for section one on its own.

**\$1500 discount** off the list price for section two on its own.

None of our normal discounts apply with this offer.
