Installation

Vinyl floor with built-in underlay

The Moduleo LayRed integrated underlay is attached to the product. It ensures easier and quicker installation, better sound dampening (up to 21dB ΔLw) and better levelling of uneven surfaces. Crunching sounds due to underlying dirt or sand grains are fully absorbed.

Combine wood & stone to create unique spaces

Enjoy the warmth of wood in the living area and the look of luxury vinyl tiles in the kitchen. Moduleo LayRed planks and tiles are perfectly compatible, guaranteeing you a seamless transition.

Uniclic® Fast, easy & reliable

Our angle-angle click system offers the best technical performance on the market: the click ensures a super strong and water resistant joint connection and an easy, convenient installation.

UNICLIC ®
PATENTED TECHNOLOGY

Unizip® Smarter clicking. Faster placing.

Herringbone floors just got a serious upgrade. Traditionally, two types of planks were needed to create the pattern. Not anymore. With the innovative Unizip® click system, your herringbone floor comes together with only one plank that clicks both ways. It's easier done that said.
