MIXON SEED SERVICE

FORAGERTM Fall Mix is designed to provide high-quality and high-yielding forage for livestock such as stockers, replacement heifers, brood cows, and dairy cows, as well as small ruminant livestock.

WHAT'S IN IT?

Horizon 214 Oats (35%)
TriCal 344 Triticale (30%)
FORAGER 4X Ryegrass (15%)
Dixie Crimson Clover (5%)
AU Sunrise Clover (5%)
Balansa Clover (5%)
Purple Top Turnips (5%)

PLANTING

Ideal planting time is from September through November. Ideal planting rate is 100 lbs./acre drilled and 120 lbs./acre broadcast.

KEY BENEFITS

- Superior mix of quality small grains, ryegrass, legumes and brassicas.
- Produces optimum forage yields with exceptional feed quality.
- Legume component adds nitrogen source to the system, improving forage quality for grazing or silage

Specially formulated with the help of Dr. Don Ball, Auburn University Extension Forage Specialist Emeritus.
