

FORAGER™

Pearl Millet

Hybrid Pearl Millet

MS

MIXON SEED SERVICE

FORAGER Pearl Millet™ is a 60-day maturity dwarf-type hybrid that produces 4-6 tons/acre and has improved digestibility. It can be used for full or short-season grazing or single-cut forage. When grazing, if it never heads out, it will continue to grow all summer. Grows well in high humidity, disease-prone environments and/or sandy soils. Its high leaf mass assures good protein and nutritional value.

There are no prussic acid concerns when grazing.

YIELD POTENTIAL

4-6 TONS

HARVEST RECOMMENDATIONS

1st Cutting 40-50 DAYS

2nd Cutting 25 - 30 DAYS

SEEDING RATES

Seeding Method	Dryland Lbs/A	Irrigated Lbs/A	Dryland Seed/A	Irrigated Seed/A
Drilled	10-12	12-14	500,000-600,000	600,000-700,000
Broadcast	15-17	17-19	750,000-850,000	850,000-950,000

SEED PER POUND: 60,000

SEEDING DEPTH: 1" - 1.5"

SOIL TEMPERATURE: 62° F

AGRONOMIC TRAITS

Ideal Harvest Height 40-50"

Total Height 50-60"

Relative Maturity Early

Days to Maturity 55-60 Days

Plant Type Juicy Sweet

Regrowth Excellent

Sugar Cane Aphid Tolerant

Downy Mildew Resistant Yes

Anthrachnose Resistant Yes

Leaf Spot Resistant Yes

Leaf Rust Resistant Yes

Double Cropping Yes
