

FORAGER™

SSH BMR

Sterile-Head Hybrid
Sorghum-Sudangrass

**MIXON SEED
SERVICE**

FORAGER™ SSH BMR is a BMR-6 sterile-head sorghum-sudangrass hybrid with great aphid tolerance. The dwarf trait produces a higher leaf-to-stem ratio, making it easier for livestock to graze without giving up biomass. The brown midrib trait increases the digestibility compared to other sorghum-sudangrasses. This is a versatile hybrid and can be used for hay, silage, grazing, or cover crop.

SEEDING RATES

Seeding Method	Lbs/Acre	Seeds/Acre
Drilled	20 lbs.	360,000
Broadcast	40 lbs.	720,000

YIELD POTENTIAL

5 - 8 TONS

AGRONOMIC TRAITS

Ideal Harvest Height	30 - 36 inches
Total Height	6 - 8 ft
Relative Maturity	Late
Days to Maturity	35 Days
Midrib Type	BMR
Standability	Excellent
Sugar Cane Aphid	Yes
Foliar Disease Resistance	Excellent
Anthraxnose Resistant	Moderate
Double Cropping	Yes
