SELECTING A NEW DOOR

WARRANTY

Limited Lifetime on
Door, Hardware,
4 Year on Springs.

Our Quality Assurance,
Your Peace of Mind.

(See Warranty Page For Details)
www.uniquegaragedoor.com

STEP 1

CONSTRUCTION

When choosing a new door, you have three options on the construction of your door. First, there is our standard 2" non-insulated door, referred to as a Pan Door. Second, is our 2" thick Super Poly Insulated Door which includes a single layer of steel plus a rigid polystyrene core with 1/4" thick Super Poly Back Skin. Strong enough to walk on and is exclusively from Unique. No other company offers it. Your third choice is our 2" thick Insulated Sandwich Steelback. Unique's Steelbacks are strong with a rigid polystyrene insulated core with a steel woodgrain textured back skin.

***Unique's Pan Door is strong,
our Polyback is stronger***

and our Steelback is the strongest!

Three good reasons to choose Unique.

Pan Door

1-GOOD

Polyback

2-BETTER

Steelback

3-BEST

STANDARD 2" THICK NON-INSULATED

GOOD

PAN DOOR

**YOU CAN NEVER GO WRONG
WITH QUIET AND STRONG!**

OUR STANDARD 2" thick non-insulated pan door features our exclusive raised shadow line for EXTRA STRENGTH. It prevents oil canning. Oil canning is waves and dips that pop and ping on the face of garage doors Unique provides extra strength for no extra cost! Unique uses our own Formula 124 steel that is thicker and heavier than other manufacturers 25 GA or 26 GA models. Strong and quiet are very important at Unique that is why we use heavy duty thicker end and center brace stiles to better support your door. Unlike others our end stiles are quiet bonded and mechanically fastened to insure quieter stronger operation. For second to none protection from the outside weather environment. We use a 1 Mil thick baked on polyester paint coating outside and unlike others, that use a 1/2 Mil finish on the inside we use a full 1 Mil thick for better protection inside and out. Hot dipped galvanized steel construction for more protection is standard. Add in a rust proof bottom weather seal retainer with replaceable bottom seal and you have great protection from the elements. **UNIQUE QUIET AND STRONG!**

2" THICK POLY-BOARD, POLY-BACK INSULATED

**DO NOT BUY A SQUEAK!
BUY ONLY UNIQUE!**

Unique has the strongest quietest and toughest poly back insulated door in the industry! Our patent pending Super Poly Back is a 2" thick insulated model that features a Unique 1/4" thick poly back skin that is so strong you can walk on it! Others use thin vinyl plastic that rips and punctures easily. They even turn yellow after a few years and peel off and ripple. We are the only manufacturer to make our super poly back insulated models with full sheets of polystyrene for second to none strength. Full 8 to 18 foot long solid one piece sheets of safe CFC free polystyrene is bonded to the steel with a patent pending urethane squeak free bonding process which is done right here in our factory! Other door companies manufacturers and sub standard distributors use standard all ready made pan doors and pop in thin vinyl skin polystyrene foam. They pop in 4 pieces per section totaling 16 pieces of foam in each double car sized door. This causes the doors to squeak from the insulation moving around because it does not get bonded together with the door. This adds no strength and squeaks! You are paying for a better door and are not getting one! With Unique, you get a real patent pending 2" thick factory made insulated model with the strongest poly in the industry. This is not a poor imitation made by others. Before you choose a different brand ask how they build their door first.....Because they might be popping in the foam on the way to your home. Loose fitting and a squeak that will last year after year. Super Poly Back uses our Formula 124 steel, that is thicker and heavier than other manufacturer's 25 or 26 ga models.

2" THICK SANDWICH INSULATED STEELBACK

**WITH AN R-VALUE OF 10...
IT MAKES IT THE BEST!**

BEST

Having a Unique Steelback is like having an insulated block wall that rolls up and down every day. They are stronger, quieter, safer, and also offer more security! Our steelbacks have a three layer construction that includes woodgrain steelback with safe, stable, rigid polystyrene insulation. Rigid polystyrene is not going to bubble, delaminate or become brittle like some of the higher R-value polyurethane doors being offered by other companies. We only use rock solid polystyrene which is tried and time tested. Our Unique process of special density foam and two layers of steel with our pressure-max bonding say it all! Our steelbacks offer rock solid performance because we only use solid sheets of foam unlike other companies that use multiple pieces to insulate. Our steelback is a stronger, energy efficient and a more quiet model.

SELECTING A NEW DOOR

Please ask your dealer for actual color chip sample before ordering. Colors printed in catalog may vary from actual color of door.

STEP 2

DOOR DESIGN CHOICE

FACT

All Unique Models come with the World's Quietest Hardware, regardless of Model or Type of Construction. Featuring a top of the line and one of a kind Heavy Duty Quiet System. Others charge more for less. Quiet is standard at Unique and will not cost you a penny more. Plus a Lifetime Warranty for peace of mind.

- Polished Aluminum Frames in Short or Long Panel sizes give that custom look.

*Brushed Aluminum Modern Smooth

A one of a kind look and feel.

Smooth- No texture sets this door apart from all the others.

Clear Anodized finish keeps it looking new year after year.

Low Maintenance - Just wipe it down with a quality stainless steel type cleaner to keep that new shiny look.

*Brushed Aluminum Modern Smooth Shown with Long Panel Window Options

UNIQUE'S Aluminum Modern View Doors are more proportional

to most residential homes. Compare them to other manufacturers and you will see.

Others use bigger box size aluminum rail frame design. This type of design was

mainly used on gas stations and automobile repair garages years ago.

They were a heavy commercial type design.

If you are in the market for a more modern friendly residential design, UNIQUE has your door!

STEP 4 SELECTING AN OPENER

1 SELECT D.C. DRIVE

For California Homeowners July 1st, 2019 • A new law will require all new automatic garage doors sold in California after July 1st to include a battery backup. That means even if only the door is being replaced, the operator/opener must be replaced as well if it does not comply to the new regulations.

2 CHOOSE CHAIN, BELT OR JACKSHAFT

All D.C. drive units are quiet. Choose based on your budget or special requirement. Chain drives are a little less money but still quiet. Belt drives cost a little more but are more quiet. Jackshaft units are a space saving, very unique and very quiet option that cost a little more than chain or belt drives. Your dealer can help you decide which model would fit you best.

3 PURCHASE FROM A DEALER

Buy your D.C drive new garage door opener from a professional door dealer. They have better, stronger models than the stores. They sell stronger one piece rail units, not 3-5 piece units like in the big box home centers/hardware/dept stores. Plus, units are full chain or full belt professional models, not 1/2 chain, 1/2 cable or 1/2 belt models. Professional models sold only through dealers are better and stronger than store purchased models.

WHAT MAKES UNIQUE SO UNIQUE?

ONLY FROM UNIQUE!

Raised shadow line is an industry first! It eliminates oil canning in the space between the raised panel and the section joint. No ugly bumps. No pops and pings, and has extra strength for life! It gives the Unique raised panel a one of a kind picture framed look, strength, and style at no extra cost.

UNIQUE EXCLUSIVE

Raised shadowline gives a picture perfect look. It makes the door stronger and eliminates oil canning.

THE OTHER GUYS? STANDARD STRENGTH STANDARD NOISE, STANDARD LOOK

Shallow standard raised panel design made by others lacks the crisp deep bevel cut detail. A flatter appearance that fades the farther you stand back, with very little curb appeal. Popping and pinging may occur from excessive oil canning.

OIL CANNING

Oil Canning is apparent on the top and bottom of the raised panel. It stands out more as sunlight hits the door from different angles. This can lead to cracking/splitting and premature door failure

Others use pencil grooves or nothing at all! They do not do the job like Unique's raised Shadow Line does. Popping and pinging may occur from excessive Oil Canning. If this happens it can lead to cracking, splitting and premature door failure. As your door goes up and down day after day, it bows and flexes. As the flexing occurs the metal fatigues and starts to crack and split. To understand, take a thin piece of metal or plastic and bend it back and forth over and over. It will break in half! This is what can happen. Unique Raised Shadow Line prevents this and makes the door sections stronger. Exclusive technology that not only makes your door look better but last longer....That's Unique!

LESS NOISE

ALL DOORS INCLUDE SUPER STRONG

WORLD'S QUIETEST • WORLD'S STRONGEST

**DESIGNED
ENGINEERED
ASSEMBLED
HERE**

DESIGNED, ENGINEERED,
ASSEMBLED IN CALIFORNIA
Factory Fresh
Less Handling, Less Damage

Made Back East/Mid West or import overseas. Bounced around for hundreds or thousands of miles. Transferred and reloaded, prone to damage.

**REPLACEMENT
PANELS
+
LOCATIONS**

If you ever need a replacement panel (car backed into door, it does happen) most Unique Panels are in stock or on the floor. If not, it can be made in days or next day emergency service.

May take weeks for replacements to be shipped from Back East/ Mid West. Could be months from overseas.

**THICKER
STEEL
NON INSULATED
DOORS**

Formula 124 Steel is thicker and heavier than other manufacturers 25ga or 26ga Models. More strength, more dent resistant.

Thinner steel has oil canning that pings and pops. Weaker and more noise period!

**SUPER
STRUT**

Patented Super Strut comes standard for all double car garages. Gives top section extra strength. One of a kind 2.5" tall Unique Design features a ribbed design for extra strength.

Standard, shorter 2" design has no reinforcing ribs for extra strength. Shorter design height does not provide as much strength as Unique's Super Strut.

**ONE OF
A KIND
HARDWARE**

World's Quietest Garage Doors come with patented 14 ga "The Real Deal" Quite Heavy Hinges plus patent pending Super Quiet Rollers with one of a kind coated steel shafts to insure no metal to metal contact.

Potato chip thin 18 ga hinges or cheap plastic hinges that can break easy. Sloppy with gaps give side to side sloppy movement. Steel roller shafts that make metal to metal contact to create more noise, even on their so called upgraded hardware.

**QUIET
HARDWARE
STANDARD**

All Unique Models come standard with the World's Quietest Hardware. Regardless of being the lowest cost Pan Non Insulated Model or highest cost Premium Steel Back Insulated Model. No up-charges, just the Best in the Industry Standard!

Others try to upgrade you for an extra cost or inflate the price and tell you it's Free with their Special Sale. What you get are cheap plastic so called quiet hinges that break easy or heavy duty sloppy and noise making upgraded hinges.

vs. Others

WORLD'S QUIETEST • WORLD'S STRONGEST

THE MOST WINDOW DESIGNS

More window insert design choices than any other Garage Door Manufacturer. Over 39 different choices - The Most!

~~THE MOST WINDOW DESIGNS~~

Most offer the standard 10 Designs. Not very much selection to choose from. Hard to match your house design with limited selection.

POLY INSULATED

Super Poly Back Insulated 1/4" thick back skin is so strong you can walk on it! Made with full sheets of foam. More strength, no squeak. Solid bonded construction. This type of design adds strength to the door plus our Formula 124 construction makes it super strong.

~~POLY INSULATED~~

Thin pieces of paper-thin vinyl backed foam, are inserted in a pan (non-insulated) door section. Not bonded, they move around, squeak and give no extra strength to the door. On top of that, it's so easy to poke a hole through the paper-thin vinyl backing. In a year, it turns yellow because it has no UV protection. Heat and light turn it yellow.

STEEL BACK SANDWICH INSULATED

Steel Back Insulated Models are the strongest in the industry. Formula 124 and 25 ga front skin and 25 ga back skin make these the thickest steel back doors in the industry. More dent resistant. Like a rolling steel wall to keep out the elements.

~~STEEL BACK SANDWICH INSULATED~~

28, 27, 26 ga thin steel back sandwich doors are the standard offered by most Garage Door Manufacturers. Thinner steel dents very easy and does not provide as much strength.

SMOOTH NO WOODGRAIN TEXTURE MODELS

Smooth, no woodgrain texture. Premium Models available in Flush Design plus Carriage House Design. A modern upgraded custom look found only here.

~~SMOOTH NO WOODGRAIN TEXTURE MODELS~~

Others do not offer a rigid smooth option like Unique.

AUTHENTIC WOOD-LIKE MODELS

Wood-like steel doors have an authentic real wood look. Dark finish color features a clear coat protection that is not found on other manufacturer's standard wood look type models. Longer lasting, real looking finish for year after year, enduring beauty.

~~AUTHENTIC WOOD-LIKE MODELS~~

No clear coat offering. Most do not look very authentic. A 2-coat process, not 3, looks more like paint than wood.
