## SUMMARY

Born in 1979, I am married and father of four children.

Having discovered coaching and its transformational and enriching power, I have followed various training courses since 2017 and have practiced it on several occasions to date. ICF accreditation is underway and is expected before the end of 2024.

I love accompanying people towards their personal fulfillment and the realization of their own potential. That's why I've chosen to work as a coach alongside my main occupation as an engineer

I have started my coaching firm C&S in 2024
