

# THE BURMAN'S TREE BRIEF

Winter 2025/Spring 2026

## Thank you for a strong year of support across our community

In 2025 we helped homeowners, schools, farms, small businesses, and municipalities keep properties safe, beautiful, and storm ready. In 2026 we are expanding our services and community involvement even further. We are proud to continue showing up at community events, supporting youth athletics, and offering education to homeowners who want healthier trees. Our goal is simple: keep families safe, support our community, and be there when you need us. **#bettercallburmans**

## Company Updates

### NOW OFFERING: Land Clearing & Site Prep

Burman's Tree Services now provides land-clearing services for commercial, residential, agricultural, and municipal clients.

Whether preparing for new construction, roadway expansion, utility work, stormwaters improvement's, or neighborhood development, our experienced crews and equipment fleet can safely and efficiently clear site of all sizes

#### What We Provide

- Full vegetation & tree removal
- Stump removal and grinding
- Brush clearing & grubbing
- Access road & staging-area prep
- Debris hauling
- Zero-waste material handling whenever possible

Land clearing is available as a stand alone service or as part of a multi phase site development partnership. If you are planning a project for 2026, now is the time to get on the schedule - contact us early for estimating and timelines

## Community Involvement & Sponsorships

Being part of our region means showing up and giving back:

**Burman's Tree Service proudly supported Chelsea's Volleyball, Wrestling, and Hockey this year!**

We love connecting with our neighbors; you'll find us around town at these fun community events:

- **Touch-A-Truck in Chelsea, Dexter & nearby communities**
- **Chelsea Community Fair – August**

If you see our crew around town, wave or stop to ask a tree question – **we're always happy to talk trees!**

# Project Spotlight

## North Branch Ecorse Creek Drain

Burman's contributed to the restoration of the North Branch Ecorse Creek Drain in Wayne County, a multi million dollar stormwater improvement project supported by a \$10M federal ARPA grant and a broader \$70M county wide budget.

Our work included clearing obstructions, stabilizing banks, and removing hazardous trees to prepare for long term site redevelopment and improved drainage.

## Did You Know?

- Mature trees provide shade that lowers cooling bills
- Pruning every 3-5 years keeps trees healthy and reduces storm failure
- Your yard can support local wildlife with the right trees kept standing
- We repurpose nearly everything we remove - chips, logs, mulch, & more

Removal of an oak tree from the center of a deck with the help of our crane

# Commercial/Municipal Spotlight

## University of Michigan

The University of Michigan is renovating a historic building known as Lorch Hall. As part of the project we removed several trees surrounding the building. These consisted of small landscape trees and shrubs. However some larger trees required the use of our lift for safe removal.

Lift equipment ready for the Lorch Hall tree removals

## COMING SOON!!

### I-94 Flex Lane Expansion

Supporting land clearing and removals for a \$380M MDOT project

Crew members removing a large pine that fell on a customers house

## MDOT: Warren Rd & Joy Rd

Land clearing & individual removals as part of a 50k roadway reconstruction corridor

## City of Dexter

We are in year two of a 3 year contract providing pruning & removals in targeted downtown corridors

## City of Chelsea

We have been providing routine service & storm response mobilizations

## City of Livonia

We were in a 2 year contract to do routine right of way tree and stump removals to maintain safety for the residents. 300+ removals each calendar year

## Ask the Arborists

**Q: If part of my tree comes down in a storm, do I need to remove the whole thing?**

**A:** Not always. Strategic pruning can often save a tree while keeping your property safe. We're happy to help you determine what makes sense.

Burman's came out and removed a very large tulip poplar and a dead spruce tree. They did great work and cleaned up very well after the job was done. I would highly recommend these guys to anyone needing tree removal.
