

AeroCoach tilt adapters & stackers for Black Inc. AB03 extensions

Many thanks for your purchase: please read the following instructions carefully as issues caused by failure to adhere to the instructions will not be covered by warranty.

Please note:

- You must NOT modify the parts in any way.
- Metal parts of the assembly be cleaned of all corrosive elements, such as sweat or saltwater, and allowed to air dry freely following use.

Assembly:

- If you are not familiar with the installation of aerobar extensions, please consult your local bike shop for advice.
1. Disassemble the current extensions from the base bar.
 2. Place the Black Inc. bar top flat mounts onto the handlebar mounting points, to create flat mounting surfaces.
 3. Place the AeroCoach bottom matched spacers onto the Black Inc. bar top flat mounts, followed by the AeroCoach tilt adapters.
 4. If you are using AeroCoach stackers (and the AeroCoach universal adjustable bridge), these should be placed on top of the AeroCoach bottom matched spacers, with the AeroCoach top matched spacers placed on top of the stackers before adding the AeroCoach tilt adapters.
 5. Pass the provided M5 25mm cap head bolts through the adapters to secure the adapters to the handlebar (please refer to manufacturer's torque for the handlebar threaded holes). If you are using stackers (and bridge), longer bolts in 10mm increments for each 10mm stacker / 10mm bridge addition should be used which can be purchased as an 'extra bolt pack'.
 6. Insert the nut carriers and nuts into the extension attachment recess of the adapters, and pass the provided M5 25mm cap head bolts down through the non-threaded holes of the Black Inc. AB03 extensions to screw into the nuts (recommended torque 4-5Nm).
 7. Attach arm rests to the Black Inc. AB03 extensions according to the Black Inc. instructions. If Align Wing carbon arm rests are being installed, please refer to the separate instructions for installation.

Please check your equipment before each ride - if you see any damage then you should not use the bicycle until it has been inspected

AeroCoach LTD does not accept any liability for issues arising due to non-compliance of these instructions. If you are unsure about the setup of your AeroCoach components, please contact customerservice@aero-coach.co.uk
