INNOVATION

Water Purification Experts

We specialize in reliable, effective water treatment solutions for homes and businesses. Our certified technicians analyze your water and recommend the right system to meet your specific needs ensuring clean, dependable water every day.

Taplin Water began in 1987 when founder Rick Taplin turned a simple dream into a trusted family business. Starting with just three water softeners and no customers, Rick built his company on integrity, hard work, and a commitment to providing reliable water treatment solutions. Nearly four decades later, Taplin Water serves thousands of loyal customers from Fargo to Farmington, offering a range of products and services that include water softeners, filtration systems, reverse osmosis solutions, and commercial services.

In 2024, Rick retired and passed the business to his son, Tony Taplin, ensuring a seamless second-generation transition. Today, Taplin Water continues its legacy as an locally owned and

operated business, dedicated to improving water quality and delivering exceptional service. What began as one man's dream has become one of the most trusted names in the Twin Cities proof that lasting success is built on honesty, relationships, and care for every customer.

The Taplin Water Product Promise: Purity, Reliability, & Unmatched Service

At Taplin Water, our commitment goes beyond just providing water treatment solutions—it's about delivering peace of mind. We understand that when you invest in your home's water quality, you expect nothing less than the best in performance, durability, and support. That's why we proudly partner with Canature, a leading manufacturer renowned for their advanced engineering and robust, high-quality water treatment systems. This partnership means every product we offer, from our water softeners to our reverse osmosis systems, is backed by Canature's industry leading manufacturer guarantee.

This isn't just a warranty; it's a testament to the superior craftsmanship and proven reliability of the equipment design to serve your family for years to come.

Aqua Flo Quick Change Reverse Osmosis (QCRO)

taplinwater.com
PRODUCT CATALOG

OUR PRODUCTS

Model # QCRO 4V-50
certified by IAPMO

R&T to NSF/ANSI 58 and CSA B483.1 for the reduction of the following substances, as verified and substantiated by test data: Arsenic V, Barium, Cadmium, Chromium III and VI, Copper, Fluoride, Lead, Radium 226/228, Selenium, TDS, Turbidity and PFOS/PFOA.

Is an excellent choice for superior, convenient, and cost-effective water purification.

Its quick change filters make maintenance effortless and hygienic, while the advanced RO technology effectively removes a wide range of contaminants, significantly improving water taste and safety. It's a compact solution offering a continuous supply of high-quality drinking water. Can be configured to meet your specific requirements. Ten interchangeable filters offer a variety of treatment options that can be tailored to local water conditions, so your water is the best it can be.

The innovative Quick Change twist and lock filter casing design makes service simple. Twist off the old cartridge and twist on the new. No messy sump removal.

Aqua Flo Platinum systems make drinking water better and life easier. manufacturer guarantee.

Check with a water treatment specialist to recommend you a RO or UF system depending on your untreated water quality.

STARTING AT \$1,150.00
Price includes installation.

Filter needs to be replaced every year.

Aqua Flo® H.E.R.O.™

(High Efficiency Reverse Osmosis)

taplinwater.com
PRODUCT CATALOG

OUR PRODUCTS

ADDITIONAL PRODUCT FEATURES:

- Heavy duty glass filled polypropylene construction provides double the strength, toughness & durability compared to most other RO's which are typically constructed with ABS

-TFC 75 GPD reverse osmosis membrane provides up to 99% Total Dissolved Solids (TDS) rejection

-Pre-filters 10" five (5) micron Spun Polypropylene Sediment Cartridge and 10" Activated Carbon Cartridge

-Quick connect fittings for easy installation

- 3/8" outlet tubing for higher flows

- Automatic shut-off valve

- An exclusive serviceable check valve that eliminates spring 'chatter' noise common in other RO's

Aqua Flo High-Efficiency Reverse Osmosis (H.E.R.O.) system. The H.E.R.O. wastes virtually no water, offering a 99.9% recovery rate by collecting purified water in the storage tank and recycling the rinse water back for use throughout the house rather than sending it to the drain.

The system also flushes the membrane with pure RO water every time the tank is full to ensure that high TDS water never creeps through the membrane during low pressure times.

After this flush, the controller de-pressurizes the membrane so that only pure, high quality RO water is produced when the system restarts. This process allows the H.E.R.O to provide up to 99% Total Dissolved Solids (TDS) rejection. Comparable systems typically waste 4-12 gallons for every gallon of RO water produced.

PRODUCT CATALOG

OUR
PRODUCTS

Transform your water: say farewell to water problems for good!

Experience the remarkable benefits of pure, clean water throughout your home. Our whole-house automatic water filtration systems tackle common water issues, eliminating unwanted iron, sediment, unpleasant tastes, stains, discoloration, and odors.

Discover our advanced filtration solutions:

- **Manganese greensand plus filters:** Oxidize and trap iron, manganese, and sulfur, effectively flushing these contaminants away.
- **Birm filters:** Remove soluble or precipitated iron without requiring expensive or messy chemical additives.

- **Taste & Odor Filters:** Specifically designed to eliminate bad tastes and odors caused by chlorine and organic compounds.
- **Neutralizing Filters:** Raise the pH of acidic water to prevent corrosiveness, protecting your pipes, fixtures, and appliances.
- **Nexsand Turbidity Filters:** Highly effective at removing suspended solids, "red water iron" (Ferric Hydroxide), and

sediment from your well or water system down to 5 microns. Nexsand delivers proven performance with double the service flow of multi-media or sand filters.

- **Chloramines Removal Filters:** This two-tank system employs specially enhanced catalytic carbon, offering superior bed depth and contact time for optimal chloramines reduction.

765 Series Softener

**- 50% Less
Salt &
28% Less
Water ***

taplinwater.com
PRODUCT CATALOG

OUR
PRODUCTS

CERTIFICATIONS:

- System Certification: IAPMO R & T.

- Certified against NSF/ANSI 44 and CSA B483.1.

- Fibreglass Pressure Tank and Control Valve Certifications: NSF/ANSI 44 certified for materials and structural integrity.

- Resin Certification: IAPMO R & T against NSF/ANSI 61 for material safety only.

FEATURES

- NSF Certified electronic downflow control valve with proven piston, seal & spacer technology.
- User friendly LCD display shows time of day, regeneration mode and gallons remaining.
- Adjustable cycle times.
- Ability to manually index to desired cycle position for faster, easier installation & service.
- Meter immediate, meter delayed, meter override and calendar clock modes.
- Self-charging capacitor keeps date / time of day for 48 hours while programming remains in permanent memory.
- NSF Certified high-gloss pressure tank.
- IAPMO R & T certified cation resin.
- Heavy-duty brine tank / cabinet constructed with NSF Certified high-density polyethylene. Twin tank models include plastic salt grid.
- Brine safety valve for added overflow protection.
- Space saving bypass with integrated turbine meter.
- Time saving quick connect fittings on bypass, drain line, brine line and power cord.
- Five year control valve warranty, ten year warranty on tanks.

*Compared to conventional calendar clock models

OPTIONS:

- Traditional twin tank or cabinet style
- Round or square brine tanks in black, blue or vanilla
- Pressure tanks in black, blue or natural
- Tank jackets with black caps in chrome, grey, blue or vanilla.

**STARTING AT
\$ 1,499.00**
Price includes
installation.

89 Series Softener

Uses up to 75% less salt and 64% less water.*

taplinwater.com
PRODUCT CATALOG

Hydrotech's premier high flow, high-efficiency softener sets the new standard for high performance while offering more features designed to make installations faster & easier than ever! The 89 Series offers a 1" port that is perfect for large homes and small businesses.

OUR PRODUCTS

CERTIFICATIONS:

- System Certification: IAPMO R & T.

- Certified against NSF/ANSI 44 and CSA B483.1.

- Fibreglass Pressure Tank and Control Valve Certifications: NSF/ANSI 44 certified for materials and structural integrity.

- Resin Certification: IAPMO R & T against NSF/ANSI 61 for material safety only.

FEATURES

- True 1" porting provides high flow rates for larger homes.
- Up flow regeneration with optimal.
- Precision brining provides high-efficiency performance and lowest possible salt usage.
- Adjustable backwash frequency saves up to 2,000 gallons of water per year.
- Large 4 line Touch Pad LCD display. No confusing symbols/codes.
- Automatic System Flush refreshes system during periods of non-use preventing bacteria growth.
- Soft water recharge performs quick regeneration ensuring you never run out of soft water.
- Soft water brine tank refill conserves capacity and keeps brine tank clean.
- Time saving quick connect features on bypass, drain line and power cord.
- Meter immediate; meter delayed; meter override; vacation and calendar clock modes.
- Self charging capacitor keeps date / time of day for 48 hours while programming remains in permanent memory.
- Space saving bypass with integrated turbine meter.
- Comes with 1" straight NPT.
- Seven year control valve warranty, lifetime warranty on tanks.

OPTIONS:

- Traditional twin tank or cabinet style.
- Round or square brine tanks in black, blue or vanilla.
- Pressure tanks in black, blue or natural.
- Tank jackets with black caps in chrome, grey, blue or vanilla.

TLC Series - Tannins, Lignin & Color

taplinwater.com
PRODUCT CATALOG

OUR PRODUCTS

Single solution systems for multiple water problems

FEATURES:

- Exclusive NSF Certified electronic control valve (systems available with Hydrotech 89, 785, 565 and 765 control valves).
- User friendly LCD display with 48 hour memory back-up of Fully adjustable cycles allow for the most efficient settings based on the specific water quality requirements.
- NSF Certified fibreglass pressure tank.
- High density polyethylene salt tank.
- Brine safety valve for added overflow protection.
- Plastic salt grid prevents salt bridging.
- Unique precision turbine meter is incorporated in system bypass valve – saving space over 4" of floor space
- Time saving quick connect fittings on brine line, drain line (with O-ring seal) and power cord for fast and easy installations.

Many groundwater supplies face various challenges that not only affect their appearance but also lead to increased costs due to clogged pipes, stained fixtures, and discolored laundry. Combination units utilize mixed beds of different media to offer a comprehensive solution for your water concerns. Tannins, which result from decaying organic matter, can stain most materials they encounter. The system employs anion exchange resin to eliminate the discoloration caused by organic decay, significantly enhancing aesthetics and preventing expensive staining.

Reverse flow regeneration with precision brining

Traditional "downflow" softeners waste the unused portion of the resin bed with each regeneration cycle. It's akin to emptying your car's gas tank before refueling! The "UpFlow Regeneration" method pushes hardness minerals upward through the already depleted resin and out to the drain, conserving both salt and the unused portion of the resin for future use. Precision brining further conserves salt by pre-making only 70% of the brine. Just prior to regeneration, the computer calculates the exact amount of brine top-up needed to regenerate only the depleted resin, saving up to 30% more salt.

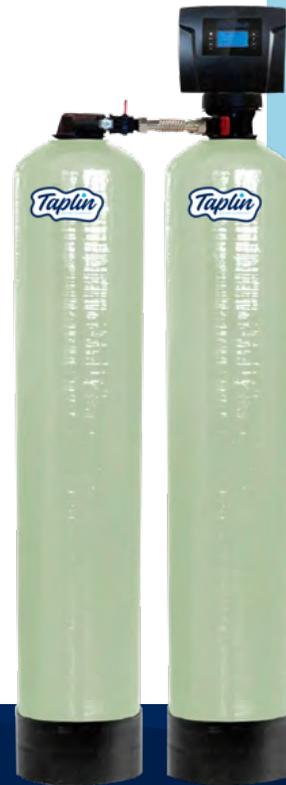

*Upflow Regeneration is available on the 89 and 785 Series HEDP models.

STARTING AT
\$ 2,500.00
Price includes installation.

BIF Chemical Free Iron Filters

AQUV Ultraviolet Disinfection System **KILLS 99.9% OF BACTERIA**

taplinwater.com
PRODUCT CATALOG

OUR
PRODUCTS

With three different sizes (8gpm/12gpm/20gpm) you can be confident that these systems will protect the entire home without the use of chemicals.

UV technology provides additional security for your water supply. It is proven to control microbiological (bacteria & virus) issues in water including E.coli, Cryptosporidium, and Giardia Lamblia without the use of chemicals.

Residential systems features:

- Three models available (8gpm, 12gpm, & 20gpm) both audible and visual lamp life indicator.
- Treats water for whole house without chemicals.
- Integral lamp life monitor with digital display.
- Includes compact design with high quality stainless steel chamber.
- Flow rates stated at 95% UVT at a dose of 30mJ/cm².
- Maintenance is simple and can be performed in minutes without use of tools.
- Patented high output UV lamps designed and engineered for high disinfection performance.
- Efficient microprocessor controlled ballast (one controller for all systems) with audible alarm and visual lamp failure indicator to show end of lamp life.
- Consistent UV output over voltage and frequency variations.

Features:

- Exclusive NSF Certified electronic control valve (systems available with Hydrotech 89, 785, 565 and 765 control valves).
- User friendly LCD display with 48 hour memory back-up 0 Fully adjustable cycles allow for the most efficient settings based on the specific water quality requirements.
- NSF Certified fibreglass pressure tank.
- High density polyethylene salt tank.
- Brine safety valve for added overflow protection.
- Plastic salt grid prevents salt bridging.
- Unique precision turbine meter is incorporated in system bypass valve – saving space over 4" of floor space
- Time saving quick connect fittings on brine line, drain line (with o-ring seal) and power cord for fast and easy installations.

HTO (Hardness, Taste & Odor Removal)

taplinwater.com
PRODUCT CATALOG

OUR
PRODUCTS

Rid your water of hardness, bad taste and odor caused by chlorine, chloramines or organic matter.

Ideal for homes on chlorinated, hard municipal water. This one-of-a-kind combination system offers the same high-quality product water of having separate softener and carbon filtration units in a space saving, one-unit design.

Certified by IAPMO R&T to NSF/ANSI 44 and CSA B481.3

Certified by IAPMO R&T to NSF/ANSI 42 for Chlorine Reduction

Your customers will also appreciate saving money.

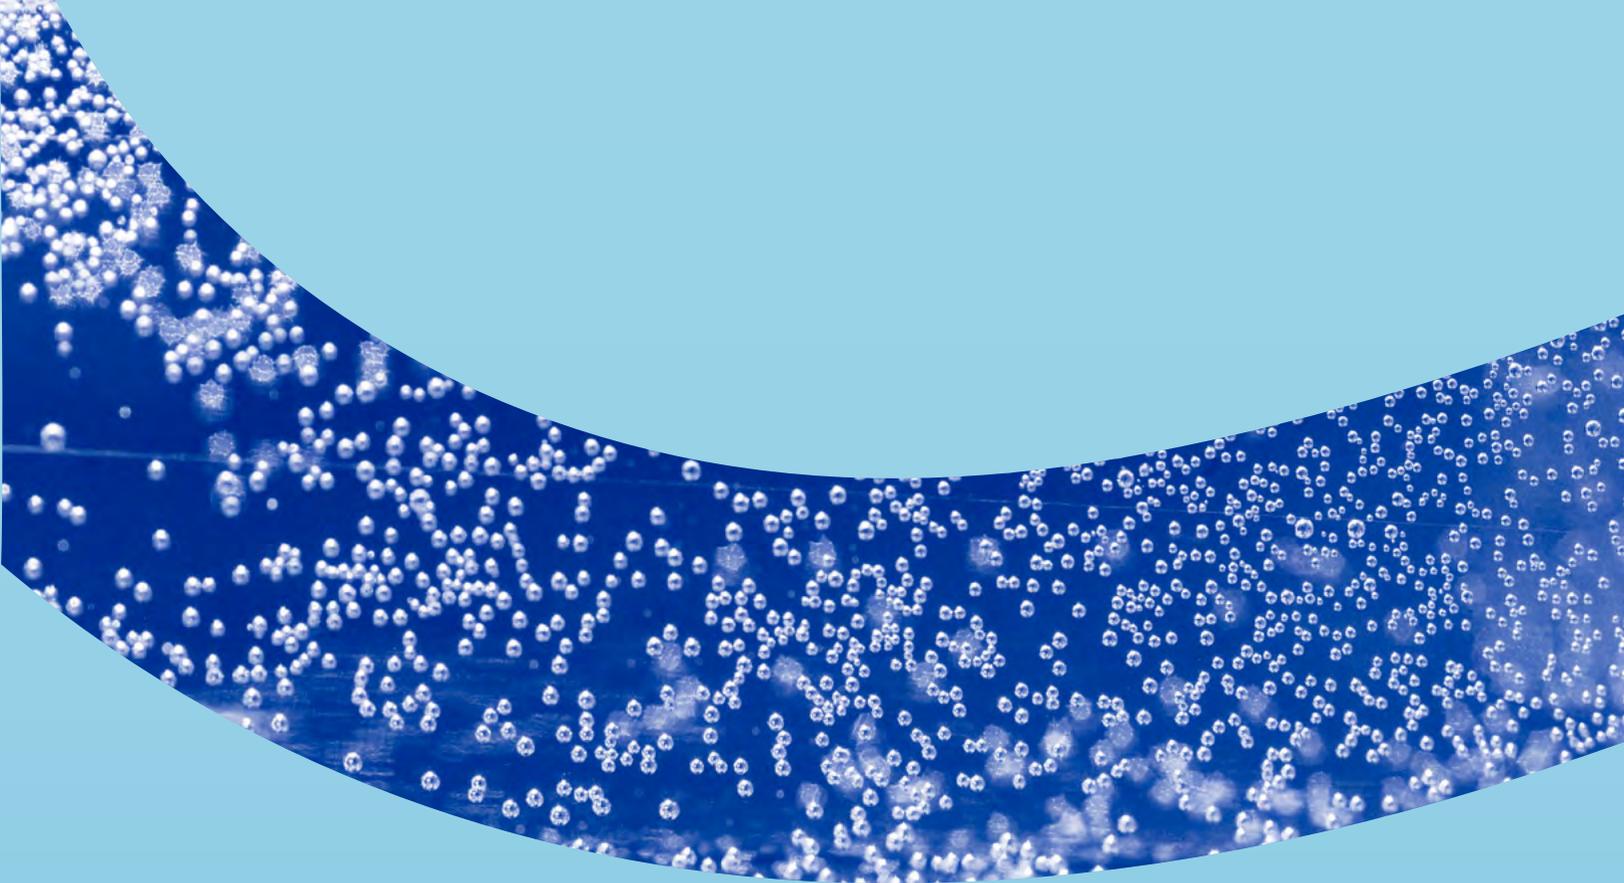

Lower Upfront Costs. Pay for one unit instead of two separate systems.

Lower Annual Costs. Our Up Flow regeneration and precision brining uses less salt and water than traditional softeners and our two-tank system allows you to change the carbon and softener resin at different times, unlike mixed bed units.

**STARTING AT
\$3,600.00**
Price includes
installation.

Up Flow Regeneration is available on the 89 and 785 Series HTO models.
