Introduction

Since 1993, we have been designing and manufacturing original statues, birdbaths, water features, benches, planters etc for home and garden decoration. We start with a concept which is then interpreted and sculpted into a 'master,' from which we take a mould and then produce castings. As our designs are original, we hold the copyright for most of our products. Our line is sold mainly through independent garden centres, nurseries, home décor stores and gift stores with gardening accents.

Our products are made from proprietary blends of high performing concrete and have unique weather resistant finishes applied. They are also sealed with an acrylic sealer. Products can stay outside year round, with the exception of bowls and other items that collect water; these may crack when exposed to the freeze-thaw cycle and should be drained or otherwise protected. We recommend cleaning with warm soapy water and a sponge. A clear acrylic sealer can be reapplied if desired although not essential.

MERCHANDISING

Retailer Support

We offer a number of complimentary programs and services aimed at supporting the retailer in selling the Castart Studios line.

- Booking programs with extended terms (available on approved credit) and transportation cost caps; please ask your rep or contact us directly for the current programs.

- Weather resistant POS (Point of Sale Material). These descriptive tags are included with each shipment.
- A current best seller list is always available.
- New products are designed on an ongoing basis and introduced via a quarterly email newsletter; please send an email to sales@castartstudios.com if you are not already on the list. An annual catalogue insert is mailed out also.
- QR (Quick Response) mobile website. With the explosion in the popularity of mobile devices, we have developed a mobile website that can be reached by scanning this QR image. A customer can search products by category or by collection and the images are formatted to be more suited to mobile devices. The QR image can be found on POS material.
- Retailer referrals. We receive many requests from consumers looking to buy our products; we refer these people to retailers in their area.
- High/low resolution images are available on request for in-house signage/promotion material or advertising use.
- Extra catalogues are available on request for retail display. Pricing labels for the catalogues are available in three pricing formats; wholesale, manufacturer's suggested retail or custom retail (please contact us for these).
- Barcodes are available by email. Unfortunately we are unable to offer barcode pricing labels for the products, but the barcodes can be used for retailers' own pricing and inventory systems.

Merchandising guidelines.

Here are a number of merchandising tips that we have found work well:

- Group the Castart Studios line.
- Group by theme.
- Create small vignettes with complementary merchandise.
- Greenery, greenery, greenery! Allows the customer to picture the piece in their garden.
- Ensure the POS tags are displayed clearly. Use fishing line or pin nails.
- Display on multiple levels. We find construction cinder blocks work well as supports. Keep the display safe for small children.
- Consider using a fountain or other large piece as a focal point and continue the display around this.
- Keep a backup inventory of hot selling items, so the display can be kept intact.
- Keep large pieces (e.g. fountains) displayed and take orders. Repeat orders can then be shipped pre-packed on pallets, saving the retailer time and keeping the display intact.
- Take photos of a successful display, this helps with re-ordering and for designing future displays.
- Fountains won't sell unless they are running and benches won't sell unless people can sit on them!
- If an item sits for a while without selling, try moving it to a different location.

Green Efforts

We use recycled packing material, boxes (when available) and pallets. We re-use waste water from the staining process; this is incorporated back into the concrete mix and thus kept out of the environment. Broken pieces are crushed and used as road-base. Paper, plastic, glass and metals go into the local recycling program. We don't pretend to be perfect, but we do what we can to mitigate our impact on the environment.

Swap-a-Pot by CASTART STUDIOS

Detachable planters for perpetual beauty

Lightweight fabric pots attach to durable concrete art to create beautiful, portable planters

1

Plant multiple detachable fabric ***Swap-a-Pots*** with your favourite plants that bloom at different times and display the most attractive in your ***Swap-a-Pot*** planter.

- Roots are naturally air-pruned once they reach the porous fabric, encouraging them to branch out with more fibrous feeder roots resulting in a healthier plant
- Oxygen rich aeration is healthy for roots and beneficial micro-organisms
- Drainage is greatly enhanced
- Perfect for seasonal displays in your favourite spot
- Store and winter your bulbs in the fabric ***Swap-a-Pots***

Swap-a-Pot by CASTART STUDIOS

Lightweight fabric pots attach to durable concrete art to create beautiful, portable planters

These planters are also versatile enough to be used with some nursery pots - a great way to display the planter and your nursery stock.

Detachable planters for perpetual beauty
