

STRUGGLING WITH PERSISTENT SPEECH SOUNDS?

See your tongue in action with Electropalatography (EPG)

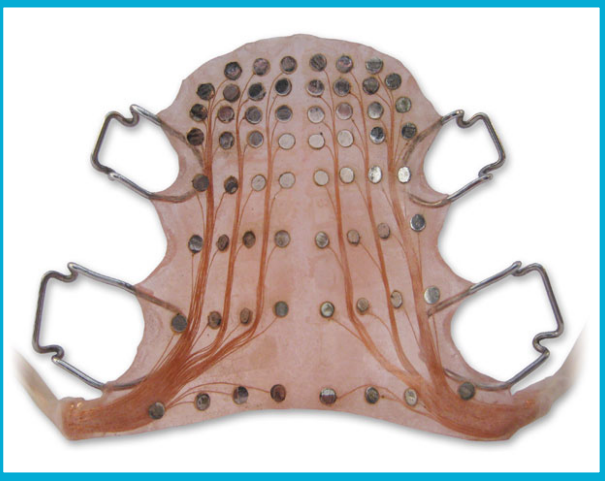

Who is it for?

- Age 6+ (with 6-year molars)
- Motivated and ready to actively participate
- Persistent speech sound errors (motor-based)
- Sounds like: /r/, /s/, /z/, /sh/, /ch/, /dg/
- Completed Phase 1 of myofunctional therapy
- No braces or palatal expanders

What Makes This Different?

- Real-time visual biofeedback of tongue placement
- Helps patients see where their tongue should go
- Targets precise contact points for accurate sound production
- Ideal when therapy has plateaued

How To Get Started?

- Step 1: Contact FAME Speech and Myo and determine candidacy for a custom EPG palate
- Step 2: Practice palate and custom EPG palate is created
- Step 3: Begin therapy using real-time feedback
