**Tina**

When I was introduced to Market America in 2011 by a physician colleague, I was skeptical because I had already tried "one of those things" and promised myself I would never do something like that again. In 2011 I was a brand-new traditional business owner of a women's healthcare clinic and I agreed to evaluate the business as a favor to my physician friend, who was helping me open my practice. When I saw the Business Plan, I got excited but thought I was missing something. Thankfully my husband, Tom, had a business mind and said we needed to try it.

Not only was I able to help my patients feel better, but I was also able to help the clinic thrive while earning a supplemental income to help my family. Twelve years later I am blessed to have made so many life-long friends (my "family") and learn so much about goal setting, team building, and collaboration. Teamwork certainly does make the dream work!

When circumstances changed and I had to close my clinic doors after 12 years, I was grateful that I had already built a successful business with Market America. I am now blessed to be able to spend as much time as I like with our four beautiful grandchildren, and Tom and I are building our dream home and will be moving to Florida in July, 2023.

I will be forever grateful to my sponsor for introducing me to this incredible opportunity, and to JR, Loren and the Corporate Team for always giving us the tools and belief we need to succeed.

I am excited for the future!
