OPENTEXT

Redefines the Fiori user experience (UX) by providing access to SAP applications from different devices giving a new dimension to the user experience allowing them to operate from anywhere.

Qualtrics creates connections between customer, employee, product and brand experiences to close experience gaps and drive value to the bottom line. Create a different user experience.

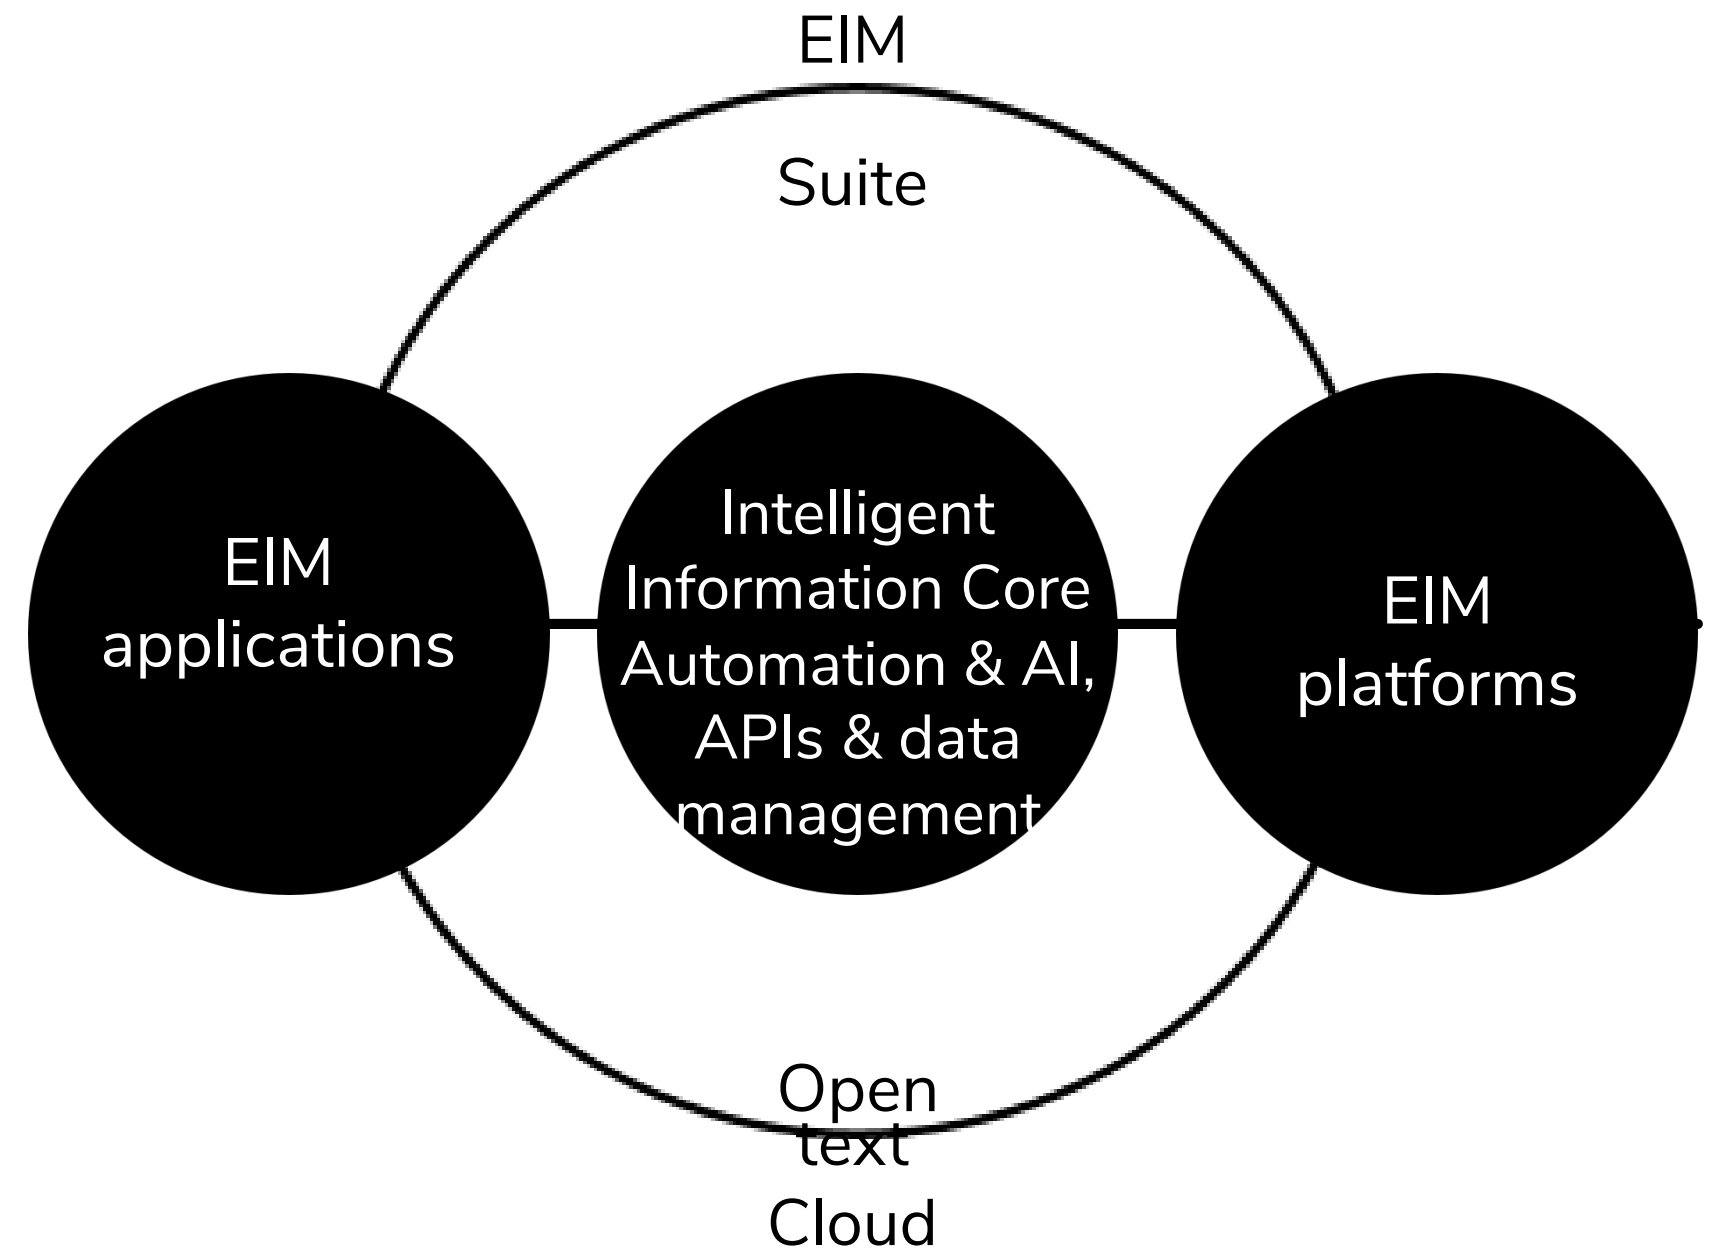

Analytics Cloud is a simple cloud solution that connects people, information and ideas for fast decision making.

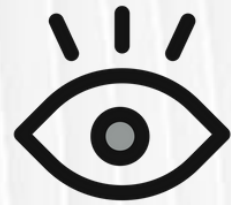

Supply Chain increases market-driven agility, enabling an intelligent supply chain along with collaborative planning giving customers what they are looking for, now.

OPENTEXT

**The smart and connected
enterprise.**

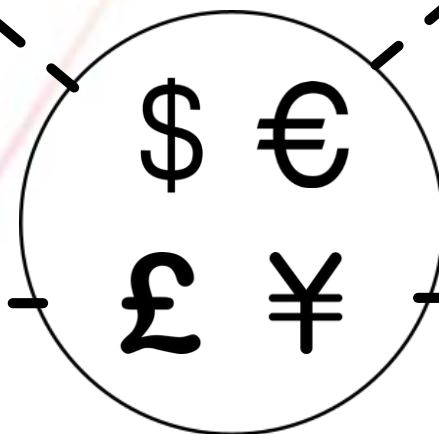

Information is the most valuable asset for digital economies. It gives companies the ability to improve efficiency, redefine business models and transform industries. Organizations must know how to make use of this information to become smarter, more adaptable, more flexible and more connected by giving a different focus and drive to customers, partners and employees.

**PAYMENTS &
FINANCIAL BUSINESS
PROCESSES**

Simplifies complexity by optimizing the payment universe (incoming and outgoing) for organizations seeking financial visibility and cash flow efficiency by providing secure and transparent processes.

organizations seeking financial visibility and cash flow efficiency by providing secure and transparent processes.

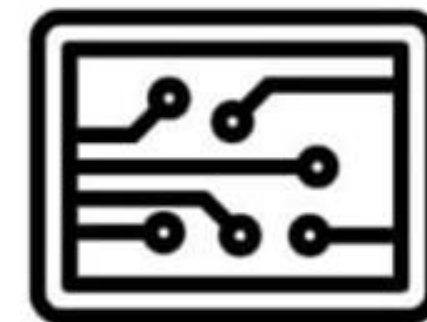

multicloud hybrid

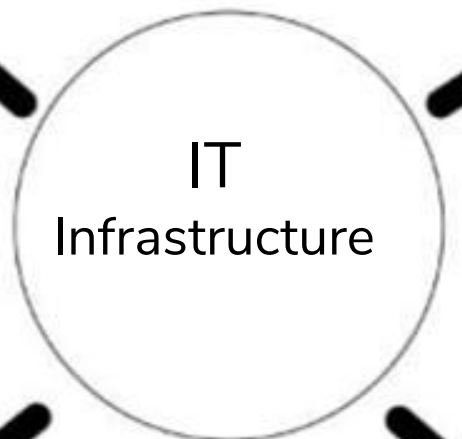

Business Process Modernization

Artificial intelligence

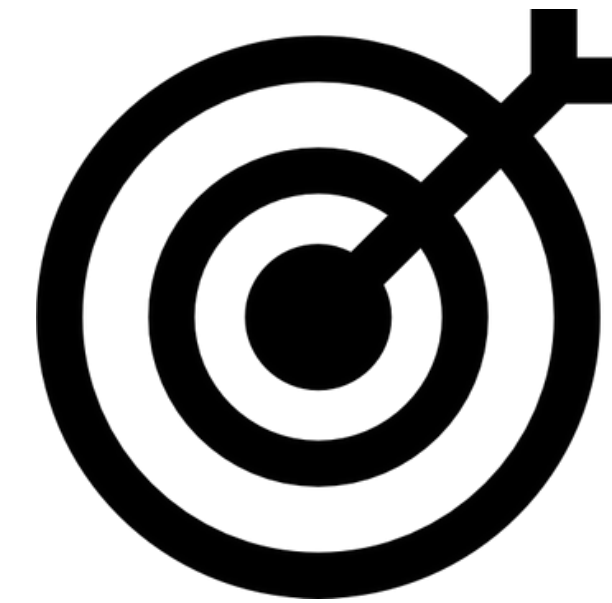

Automation

Servers and data storage to take advantage of the potential of the hybrid multi-cloud strategy.

Revolutionize your infrastructure with affordable and secure scalability, unprecedented encryption, cloud-native development and impeccable cyber resiliency.

Successful cases

With well-known global brands including Andrex, Cottonelle, Depend, Huggies, Kleenex, Plenitude, Poise, Scott and U by Kotex that are an indispensable part of people's lives in more than 175 countries.

"When two companies start a journey together innovative things can happen."

With SAP Vendor Invoice Management solutions we achieve:

STANDARDIZE

The processes of receiving, controlling and accounting for supplier invoices in 19 countries in Latin America.

SIMPLIFICATION

The VIM solution made it possible to replace manual and semi-obsolete tools with an innovative, robust and fully automated solution.

AUTOMATION

The solution made it possible to achieve an efficient process, considerably reducing invoice processing time and the backlog of accumulated invoices.

CENTRALIZATION

Increased collaborative work between the different teams necessary to solve invoice processing problems.

Ledesma

Argentine agribusiness company with more than 100 years of history, leader in the production of sugar and paper and with an important participation in the fruit and citrus juice, alcohol, bioethanol, meat, cereals and corn syrups and starches markets.

"In the path of innovation and automation we find thousands of possibilities."

With SAP Vendor Invoice Management and Extended Enterprise Content Management we achieve:

To support the organization and visibility of the tasks associated with the payment of supplier invoices through the implementation of the SAP VIM integrated solution, allowing the management of paper and electronic invoices of the Accounts Payable area, standardizing the corrective actions associated with daily exceptions, streamlining them.

To have a control point that allows measuring the performance of the processes, eliminating the delays inherent to manual management.

Deliver to the business a Document Management solution capable of supporting the company's document processes.

Thank you!
