Safer Sleep Policy

Policy statement

We recognise that sleep and rest times are key times in the day for being close and promoting security and are an important part of a child's unique and individual care. Younger children will need to sleep but older children do not usually need to. No child is made to sleep. Our sleep and rest procedures at comply with the EYFS and the latest available safety guidance.

Partnership with families

As part of a child's settling in we will ask about their usual sleep and rest preferences and routines. As far as possible we will follow their usual routine, however, children's routines may change once they are in the preschool, and we will respond flexibly. Children's sleep and rest preferences are recorded, and parents/carers are informed of any significant changes to a child's sleep routine.

If a child is not ready to sleep, they are never forced to. If we feel a child is ready to sleep or it is their usual sleep time, we will settle a child to sleep and soothe them, if after 15 minutes they are not sleeping they will be encouraged to rest or go and play as appropriate. Under no circumstances is a child ever physically restrained whilst trying to settle them to sleep. We allow children to sleep for a cycle appropriate to their age and stage as this promotes their development and wellbeing needs.

Staff training

We complete a comprehensive induction which includes safer sleep training. All staff are required to read Lullaby Trust Guidance on Safer Sleep and the NHS advice on sudden infant death syndrome.

Children asleep on arrival at the preschool

If a child arrives at the preschool asleep, they are sensitively woken whilst the parent/carers are still present. The child is then settled on a flat, clean sleeping mat if they are still sleepy, but otherwise well.

If a child does not show signs of going back to sleep after being woken, they are welcomed and settled into the session at their own pace.

The sleep environment

The manager ensures a risk assessment is completed for the sleep area to ensure that it is safe and meets the requirements set out in the EYFS and British Safety Standards. This is reviewed each time a change to the environment is made and at least annually. A daily check of this environment takes place before any children arrive and periodically throughout the day.

An emergency plan is displayed, showing what action to take if a child stops breathing whilst asleep. There is a room thermometer in the sleep area that is checked when settling a child to sleep and the temperature recorded.

The sleeping environment must be:

- Be clean and uncluttered.
- There must be no shelves or objects above where the child is sleeping.
- The room temperature should be between 16–20C monitored by a thermometer in the sleep area. This must be recorded on the sleep checklist when children go to sleep
- The room should be well ventilated.
- Children aged over 12 months must be placed down on their back in their own separate sleep space on a clear, flat, firm surface such as a cot, bed or suitable mattress on the floor.
- Children must sleep head to toe to reduce the spread of infection.
- Every child has a place where their clothes and comforter are stored. This is labelled with a photo so they can identify their basket (if used).
- Pillows, cot bumpers and duvets, are not used

Supervision of sleeping children

- A sleeping or resting child is always within sight and hearing of staff.
- A ten-minute timer is used to remind staff to check sleeping children and carry out an active check on their well-being.
- Each active sleeping checks is recorded with the time, and date of the check and is signed by the staff member making the check.

An 'active' sleeping check on a child involves:

- Placing a hand on the child's chest or near their mouth to check they are breathing.
- Visual check: do they look different to usual? Check the colour of their lips and if you gently press their fingernail does blood rush back? For children with dark skin does their palm look yellow?
- Temperature check: ensure the child is not too hot or too cold. This must be done by putting your hand on the skin on their chest or at the back of their neck.
- Check that bedding is not wrapped around the child or covering their face.

Children aged over 12 months

- Children sleep on rest mats and have their own individual bedding.
- Children have a suitable place to store clothes, shoes and a special toy, book or comforter for sleep.
- Nappies are changed and heavier clothing removed.
- Hair accessories that may come lose or detach are removed before sleep/rest time.
- Children are settled by a member of staff and comforted to sleep. Staff may gently stroke or pat children.
- If children fall asleep in-situ it will be necessary to move or wake them to make sure they are comfortable. Sleeping children are regularly checked at least every ten minutes and are within sight and/or hearing of staff. Hats and extra clothing are removed as soon as they are indoors or enter a vehicle.
- We will only let children sleep in buggies, pushchairs or prams if they lie flat and we have written permission from the parent
- All bedding will be cleaned, as required and at least weekly
