

BROADLEAF WEED CONTROL GUARANTEE

We guarantee our Broadleaf Weed Control for all customers signed up for 5 - 7 treatments. Notify us within the window of time below about any broadleaf weeds that weren't controlled and we'll **RETREAT FREE OF CHARGE!**

DAY
1

BROADLEAF WEED CONTROL APPLIED

A liquid broadleaf weed control will be applied to any active broadleaf weeds on your property. This product is formulated to cling to weeds and for application during rain. Moisture is beneficial to this product, allowing weeds to absorb the weed control more completely.

DAY
10

CHECK YOUR WEEDS

Our broadleaf weed control does not control weeds on contact. Instead, it accelerates the growth cycle. Because of this, it takes about 10 days for broadleaf weeds to fully respond to treatment. If weeds haven't responded by day 10, contact us as soon as possible to retreat.

DAY
14-21

LAST DAYS TO CONTACT US

If weeds have not responded by day 10, customers must notify us based on the schedule below:

- 5 treatment customers: by day 14 post-treatment
- 6 treatment customers: by day 21 post-treatment
- 7 treatment customers: have UNLIMITED retreats

3-5
WEEKS

EXPECT NEW WEEDS

New weeds continually germinate during the growing season, so you should expect new weeds to appear every 3-5 weeks. If you are signed up for less than 6 treatments, there will be a gap between summer treatments when weed invasion may take place.

Broadleaf Weeds That May Require Multiple Treatments to Control

Wild Violets

Clover

Ground Ivy

*The **BEST DEFENSE** against broadleaf weeds is a thick, dense lawn that **PREVENTS** them from growing!*
