By-law and Price List

This by-law sets out the rules and regulations that govern Crématoire Guenette Crematorium (hereafter known as the "Crematorium") and have been approved by the Registrar, Funeral, Burial and Cremation Services Act 2002, Cemeteries Regulation Unit, Ministry of Government and Consumer Services.

Article 1: Identification of the deceased shall be made prior to delivery of the deceased to the Crematorium.

Article 2: The regular Crematorium operating hours will be from 7 a.m. to 7 p.m., Monday to Friday. All correspondence is to be sent to 108 Byng Avenue, Kapuskasing, ON P5N 1X2

Article 3: Before cremation can take place, the following documents must be completed, delivered to the office or Crematorium, signed by the proper authority, and approved:

- (1) Application for Cremation
- (2) Contract to provide Cremation Services
- (3) Coroner's Cremation Certificate
- (4) Burial Permit
- (5) Payment

Article 4: Only human remains will be accepted for cremation. Furthermore, no extraordinary or foreign objects may be placed into the casket or cremation container.

Article 5: The remains of the deceased shall be received for cremation in a fully combustible casket or cremation container deemed appropriate by the Registrar. The casket/cremation container must have a top, four sides and a solid bottom allowing the casket/cremation container encasing the human remains to be moved using a set of rollers.

Article 6: Once received by the Crematorium personnel, the casket/cremation container will remain closed unless authorization is given by the Applicant, a Judge's order or a Coroner's order allowing a licensed Funeral Director to open the casket/cremation container. Under no circumstances will Crematorium staff be allowed to open the casket/cremation container. The deceased will be cremated in the delivered casket/cremation container, which must be made of readily combustible materials. All non-combustible parts on the outside of the casket/cremation container, including, but not limited to casket handles and other exterior fittings, will be removed prior to cremation, if possible, and recycled.

Article 7: The staff of the Crematorium will not cremate a casket/container constructed of non-flammable or hazardous material or a material prohibited by the regulations under the Funeral, Burial and Cremation Services Act, 2002, of Ontario Regulation 30/11, nor will the Crematorium cremate a body in which a pacemaker or other prohibited device, material, appliance or part thereof is present. This does not limit the right to refuse to cremate, in any instance, and without specifying reasons.

Article 8: The staff of the Crematorium will not under any circumstances cremate an individual with radioactive implants, or an individual who has received microscopic radioactive isotope treatment, such as TheraSeed®. An implant heart pacemaker or other implant radioactive devices could explode during the cremation process and are to be removed by the funeral establishment, transfer service operator, or any other personnel responsible for the removal of such a device, before the deceased is delivered to the Crematorium for cremation. The Applicant of the cremation services will be liable for any damage caused to the Crematorium and/or for the injury/radiation exposure to Crematorium staff for failing to notify the funeral establishment or transfer service, or any other personnel responsible for the removal of such a device, of the existence of such radioactive implants.

Article 9: Twenty-four (24) hours' notice is required before a cremation can take place.

Article 10: Twenty-four (24) hours' notice is required if relatives and friends wish to view the cremation process. A limited number of observers will be allowed in the Crematorium before or during a cremation for an additional prescribed fee as per the current price list of services. Access can be denied by the Crematorium staff at all times. The Crematorium is a facility that provides services exclusively to funeral homes and is not licensed to provide services directly to the public.

Article 11: A stainless steel/metal identification tag will be placed with the deceased throughout all the stages of the cremation process; the tag shall be placed with the cremated remains into the primary urn or container at the conclusion.

Article 12: Due to the nature of the cremation process, no jewelry or other personal property or material will be recoverable after cremation and such property or material should be removed before the casket/cremation container is transferred to the Crematorium. Any personal property or material left in the casket/cremation container on transfer to the Crematorium shall be at the sole risk of the Applicant. The Crematorium, the funeral home, or the transfer service shall not be responsible for the loss, damage, or destruction of same.

Article 13: The staff of the Crematorium will not cremate the remains of more than one person at a time.

Article 14: All cremated human remains shall be placed in a sealed, plastic container, provided without additional charge by the Crematorium, or purchased by the Applicant and/or the family of the Deceased. In the event that any such container supplied will not hold all the cremated remains, an additional temporary plastic container will be supplied by the Crematorium without additional charge.

Article 15: Where and when possible, the Crematorium may provide, at its discretion, expedited services outside of regular business hours for an additional prescribed fee as per the current price list of services.

Article 16: Cremated remains will be returned to out of town funeral establishments by means of the ONR Bus system and the cost will be included in the cremation fee. Under no circumstances will the Crematorium ship cremated remains outside of its service area by any other means. This would be the responsibility of each funeral establishment.
