

MONSTER HIRE

QUALITY EQUIPMENT – REALISTIC ADVICE – OUTSTANDING SERVICE

**CAPABILITY
STATEMENT**

Welcome...

Monster Hire provides Dry, Wet and Sub Hire plant to the resource, civil, construction, rural and related industries within the Surat Basin. By understanding unique site requirements, recognising individual project budgetary constraints and client needs; Monster Hire is able to offer specialised equipment and staff of exceptional quality at competitive rates, backed by outstanding 24/7 customer service.

Monster Hire was founded in 2010 in the Western Downs region of Chinchilla and is proud of its now 100% female full time staff; servicing clients throughout the Southern half of Queensland from multinational, global organisations to not for profit and small business. Living and working within our region is a priority to ensure we provide exceptional service and delivery of quality machinery to our clients. All our permanent staff live in Chinchilla and our ownership is 100% local.

QUALITY EQUIPMENT – REALISTIC ADVICE – OUTSTANDING SERVICE

Our Engagement...

Culture and People

While Monster Hire has spent the last decade growing and developing with the major CSG proponents; the company's DNA remains essentially rural-based. From western Qld to the Darling Downs this family owned company has evolved and diversified off the back of the people we employ, the projects we've helped deliver and the clients with whom we work.

In 2021 with ample fleet & equipment to support major projects, Monster prides itself as being small enough to be solution driven and embraces a 'fit for purpose' mantra when operating on Landholder's properties. Safety & service are key to our daily works program as is demonstrated through the quality & presentation of all our equipment, but so too are site specific access rules and entry conditions to adhere to on farm biosecurity requirements.

Monster is able to help people deliver work programs where ever they may be and whatever they may include; completed on time and focused on assisting to fix problems and resolve paddock-based issues once and for all. With a small and nimble staff & operators or through provision of reliable machine & attachment combinations for any application, Monster is confident that we can add value to existing relationships and contribute to building new ones through a professional and timely delivery of scope - meeting budget & schedule.
