#### **Customized Education**

Our learning programs are specifically designed to meet the individual needs of students who need to be challenged academically or those who need extra help.

It's not just about answering the question. Our students develop effective learning strategies that enable them to build confidence and a strong educational foundation.

#### **Deborah Knutson, Director**

B.S. in Physics and Master in Teaching
Whitworth University

Since becoming a teacher in 1997, my mission has been to provide an alternative in education while maintaining academic excellence in a caring, safe, and fun learning environment.

Coping with visual and auditory central processing disorders has given me the empathy, insight, and motivation needed to develop effective educational programs for students with varying needs and abilities. I love when my students realize that they can achieve their

goals and when their thoughts of "I can't, it's just too hard" change to "I can, I just need to do something different."
