Australian Refrigeration Council

## COMPANY BACKGROUND

Central Electrical Group was established in 2014 by Managing Director, Jeremy Lanzon. Over the years, Central Electrical, has seen consistent growth which has allowed the company to expand from a Sole Trader business to a Private Company with 9 trusted employees.

During its infancy, Central Electrical Group (previously known as Calliope Electrical & Telecommunications) focused mostly on domestic installations and maintenance such as re-wires and renovations, new homes, small installations and repairs.

More recently, Central Electrical Group has expanded to include maintenance contracts for various property management companies, submission of Electrical Safety Inspection reports to multiple banking managers as well as completion of works for local government councils and mining sites.

As energy management plays a more important part in the Electrical Industry, Central Electrical Group invested in products and training to assist clients where energy was concerned. This venture has seen the installation of multiple EV charging systems across the region as well as the introduction of remote monitoring of energy production and usage.

Central Electrical Group is a proud family-owned and operated business and has instilled a company team culture of loyalty amongst the company's long-term employees and clients. Our vision for the future is to foster a higher standard within the Gladstone Region for electrical safety and compliance.

# CORE COMPETENCIES

## QUALITY

Central Electrical Group is committed to providing its clients with the highest quality service at competitive industry rates. We employ only the best people with extensive skills and knowledge. We ensure our customers deal direct with our team which allows for a personalised service with first-rate communication. All staff are supplied with iPads with up-to-date job management software and GPS tracking for accurate reporting and invoicing. All staff are well presented ensuring we compliment your professional sites.

## HEALTH & SAFETY

Central Electrical Group is an active member of Master Electricians Australia. Working with MEA helps us monitor and improve our safety management systems.

We invest time and resources to make sure our team have the knowledge and skills to think on their feet and comply with all regulations on building and construction sites.

## EXPERIENCED STAFF

Our industry is diverse. We have staff that are skilled in all areas. We are not just lighting and power point installers; collectively our staff hold the following qualifications, accreditations and licences:

- Electrical Licence

# CUSTOMER FEEDBACK

Signage Gladstone Pty Ltd have been using Central Electrical Group for 2 years on all my signage that requires electrical connections and new wiring from circuit board to sign they have always been on time, had a great price and have always given me the best option in the type of install to use for both for me and my clients, best electricians in Central Queensland by far.

## SIGNAGE GLADSTONE

Jeremy and the team at Central Electrical go above and beyond in every aspect of their work. They are professional and I highly recommend their services.

## EVO PORTABLES

Quick and knowledgeable.
