

# THE REMYROC WASH GUIDE

## 6 STEPS TO A PERFECT FINISH

1

### PRE-WASH

- **Citrus Pre-Wash:** Helps to remove road grime and bugs.
- **Snowfoam:** Loosens and softens dirt.

2

### MAIN WASH

- **The Triple Bucket Method:** Wash-Rinse-Wheels. Place a grit guard in each of the 3 buckets and use a good-quality wash mitt.
- **Dry:** Use a thick microfibre drying towel to soak up water after rinsing your vehicle.

3

### DECONTAMINATE

- **Tar and Glue Remover:** Acts fast to remove tar spots.
- **Iron Fallout Remover:** Chemically removes iron particles and reduces marring during the claying process.
- **Clay Bar:** Removes the contaminants that chemicals can't.

4

### CORRECTION & POLISHING

Identify whether your paint needs a one, two or three stage polish:

#### BAD PAINT

Compound and firm pad.

#### OK PAINT

Swirl remover and medium pad.

#### GOOD PAINT

Finishing polish and soft pad.

5

### PROTECTION

- **Sealants:** Provides long-lasting protection to your paintwork.
- **Ceramic Wax:** Adds further protection and additional gloss to your paintwork.

6

### MAINTAIN

- **Quick Detailer Spray:** Maintains your protection and keeps your paintwork glossy!
