

NEW ULTRA FOGGING

Introducing the **ULTRAFOG-1200SV**. The New Ultra Fine (DRY) Fogger, designed for super-fast deployment of Pure Hypochlorous Acid for aerosol and surface disinfection.

- **SUPER FAST HYPOCHLOROUS ACID FOGGING (HOCl)**
- **EASY REFILL - EASY CONTROL - 12L TANK**
- **ULTRA FINE PARTICLE FOGGING - 1-5 MICRONS**
- **REDUCES RESIDUE**
- **MULTIPLE PIPE EXTENTIONS AND 360 DEGREE OUTPUT OPTIONS**
- **ESTABLISHED SUPPLIER WITH MANY YEARS OF HOCl USE**

CliniTech Medical's Ultra Fine (DRY) Fogger uses a unique low energy ultrasonic technology to create large amounts of Ultra Fine Hypochlorous fog particles, for use in any indoor space up to 200 sqm.

Existing cold ULV foggers use a loud electric fan to aerosol the normally hazardous chemicals into the air. The challenge for many is that these cold ULV devices create a much larger particle size,

meaning too much of the disinfectant can be placed into the environment. The larger particles fall to the ground faster and can leave additional dampness and residue. This can ultimately lead to damaged surfaces and equipment.

The **ULTRAFOG-1200SV** works differently by producing its fog with 4 efficient ultrasonic energy exchangers, which produce large amounts of Ultra Fine Fog at a rapid rate. The easy to use control panel enables the user to control the amount of Ultra Fog, given the size of the room. The Ultra Fine Fog fills a room quickly and will greatly reduce the chances of surface and equipment damage. Taking only about 30 seconds for the Ultra Fog to fill a 3m x 3m room

INCLUDES 10 LITRES OF HOCl SOLUTION

6 LOG KILL RATE 99.9999%, BPR Approved, 10 second contact time.

Established in 2014, Hertfordshire based CliniTech Medical LTD provides several health and wellbeing infection control technologies to markets such as: - Dentistry, Veterinary, The NHS, Food Industry and Pharma. www.clinitechmedical.co.uk 01438 230 037.
