

Bio S.I. Agricultural Formula is not a registered bio-fungicide. The purpose of the soil inoculant is to add diversity of beneficial microbes back into fumigated fields.

AGRICULTURAL FORMULA

- Increase biological diversity in the soil
- Increase nitrogen fixation
- Increase phosphorus availability
- Fertilizer optimization / nutrient use efficiency
- Improve stress tolerance
- Improves soil resilience
- Reintroduce beneficial microbes to soil post fumigation

| APPLICATION RATE | |
|------------------|---|
| OUNCES PER ACRE | AG PRODUCT |
| 1 - 2 | Twice per month through drip in greenhouses and grow beds |
| 4 - 6 | Seed treatment |
| 4 - 8 | General maintenance application in furrow starter, pre emerge broadcast application or side dress |
| 12 - 16 | Corrective action application as a post-fumigation soil health tool in furrow or drip irrigation |
| 12 - 32 | Broadcast or through pivot irrigation |
| ROOT DIP | 1:1 ratio (1 ounce Ag Formula : 1 gallon of water) |

| ACTIVE INGREDIENTS | |
|---|--------------------|
| CONTAINS NON-PLANT FOOD INGREDIENTS | |
| <i>Arthrobacter globiformis</i> | 2.2 million CFU/mL |
| <i>Bacillus licheniformis</i> | 1.8 million CFU/mL |
| <i>Bacillus pumilus</i> | 2.0 million CFU/mL |
| <i>Bacillus subtilis</i> | 2.0 million CFU/mL |
| <i>Acinetobacter calcoaceticus</i> | 0.4 million CFU/mL |
| <i>Azotobacter vinelandii</i> | 0.4 million CFU/mL |
| <i>Pseudomonas alcaligenes</i> | 2.0 million CFU/mL |
| <i>Pseudomonas fluorescens</i> | 1.4 million CFU/mL |
| <i>Pseudomonas putida</i> | 1.2 million CFU/mL |
| <i>Pseudomonas pseudoalcaligenes</i> | 1.0 million CFU/mL |
| 0.06% humic acids derived from leonardite | |

FOR USE ON:

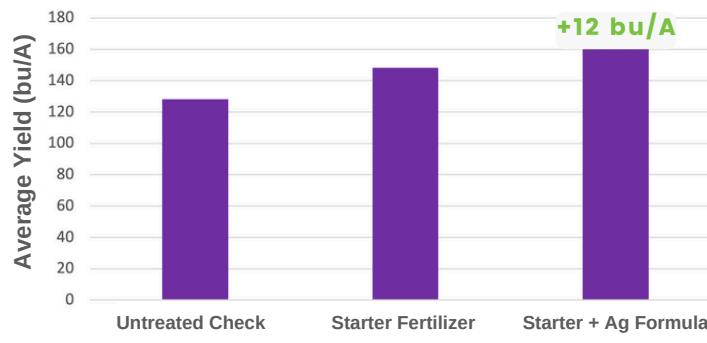

ROW CROPS, BROADCAST CROPS, PASTURE, LEAFY GREENS, BERRIES, CITRUS, FRUIT, NUT TREES, SEEDS, HEMP, CANNABIS AND ORNAMENTALS.

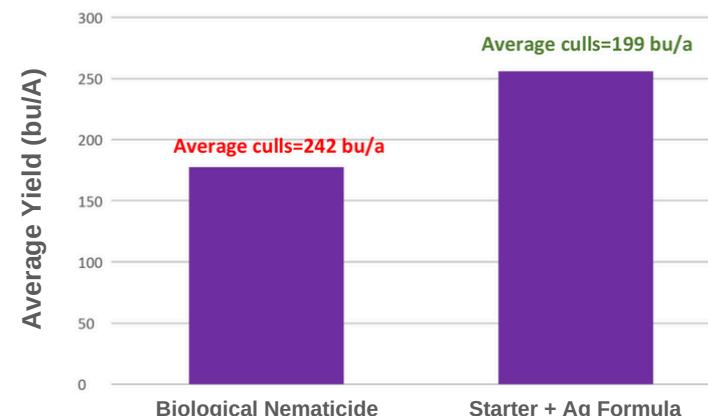

AGRICULTURAL FORMULA IN THE FIELD

Bio S.I. Agricultural Formula:
NC State University Corn Trial (2019)

Bio S.I. Potato Field Trial: Yield

BIO S.I. AG FORMULA INCREASED BOTH YIELD AND QUANTITY OF MARKETABLE POTATOES.

- Ag Formula increased average yield
- Ag Formula decreased average culls (unmarketable)

- Ag Formula applied in furrow at 16 ounces / acre
- ROI Starter Fertilizer \$72.60
- ROI Starter + Ag Formula \$117.86
