WINNERS AND  
SPECIAL MENTIONS  
BEST PHOTOGRAPHY  
AWARDS 2025

The rankings were assigned by THE ROAD PHOTOGRAPHER based on an evaluation of multiple aspects, starting with what is fundamental to this segment of photography: the content of the shots, the communicative ability, and the strength of the image. This was followed by an evaluation of technical aspects, such as framing, composition, post-production, and black and white. The photographs submitted are all of a high standard, but as often happens in these cases, the highest score is due to minimal differences in evaluation but sufficient to assign a more or less favorable score for the purpose of assigning the different rankings. Thanks to all the photographers
