powder products

Goat Colostrum Powder: Nature's first superfood

First milk

produced within 24 hours after birth

Rich in bioactive compounds

(IgG, IgA, growth factors)

Contains lactoferrin and cytokines

Gentle spray-dried

to preserve nutrients

Nature's first superfood

Goat colostrum is a nutrient-rich gift from nature, supporting immunity, gut health and overall wellbeing.

Scientifically Backed Functional Benefits

Supports immune system function

Helps strengthen natural defenses and overall well-being

Improves gut health and microbiome balance

Promotes a healthy gut environment and digestive function

Enhances muscle recovery and performance

Supports faster recovery and physical performance

Contains anti-inflammatory properties

Helps reduce inflammation and supports overall health

Quality you can trust

Made from carefully sourced goat colostrum and backed by science.

Why Goat Colostrum? (vs. Cow)

Easier digestion

More gentle on the digestive system

Lower lactose burden

Naturally lower in lactose

Higher tolerance for sensitive individuals

Hypoallergenic and better tolerated

Strong bioactivity of immune compounds

Rich in immunoglobulins, lactoferrin and cytokines

Premium positioning for high-end nutrition products

Superior quality for premium formulations

To be used as ingredient in goat infant formula (stage 2 and above) and elderly formulas

Due to infant grade microbiological plate counts <10.000

From nature. Backed by science.

Goat colostrum offers unique benefits that set it apart from cow colostrum.

Our Products

Premium goat colostrum products, backed by science and crafted for quality.

Colostrum Powders

Colostrum Capsules

Tested in Our Certified Laboratory

Every batch is tested in-house in our certified laboratory and by an independent 3rd party laboratory to ensure the highest quality, safety and consistency.

Quality you can trust

Our colostrum is processed using a special gentle spray drying method to contain all bioactive nutrients.

Up to 30% IgG

We can produce colostrum powders with up to 30% IgG content.

Highest Quality Standards

Rigorous testing for purity, potency and microbial safety in every batch.

Safe & Consistent

Advanced testing ensures every batch meets the highest safety and quality standards.
