

WHAT IS ENDURE?

ENDURE is a powerful combo of all natural bacteria strains that vigorously consume FATS, OILS & GREASE in any plumbing system.

ENDURE is a "Green" product that is safer for people, pets, plumbing and the planet.

Residential Application

Endure Creates Free Flowing Drains
Without Using Harsh Chemicals

RESIDENTIAL DIRECTIONS

- 1) Treat each drain in home with 1 cap full (4 oz) ENDURE.
- 2) Repeat dosage every two (2) weeks for the first two (2) months.
- 3) After two (2) months, repeat dosage every four (4) weeks.

HOW DOES ENDURE WORK?

In every recommended dose of ENDURE, billions of living bacteria "wake up" and feed on dead organic waste in grease, food particles, soap, scum, paper & bio-material. The colony will double in count every 20 minutes leaving a "BIO-FILM" in every inch of the plumbing system.

Septic Application

- 1 Bottle Directly Into Tank or Clean-Out
- 4 - 8 Ounces into Toilet & Drains in House
- Flush Toilets
- 4 - 8 Ounces Every Two Weeks in Kitchen & Shower Drains

SEPTIC DIRECTIONS

- 1) Pour 64 ounces of ENDURE into tank, clean out or D-Box.
- 2) Treat kitchen & shower drains with 4 ounces of ENDURE every four (4) weeks.
- 3) For large septic systems, it is recommended to double the dosage.

ENDURE RESULTS!

When properly treated, ENDURE creates free flowing drains, eliminates foul odors, destroys drain fly colonies, restores drain fields & reduces grease trap pumping.

Commercial Application

- Install Pail & Pump under 3 Compartment Sink
- Treat Side Drains with 4 ounce dose
- Repeat Service Every 6 weeks
- Charge Customer with "Service Pricing"

COMMERCIAL DRIP DIRECTIONS

- 1) Set five (5) gallon pail pump to inject 14 ounces per day.
- 2) Treat side drains with 1 cap full (4 oz) ENDURE.
- 3) Replace pail and repeat side drain service every six (6) weeks.
