

The Gold Standard in Perinatal
Bereavement Care

CAPABILITY STATEMENT

The Caring Cradle® is a reliable perinatal bereavement device engineered specifically for IUFD, neonatal death and stillbirth. Designed to maintain the physical integrity of an infant's body, the Caring Cradle allows families more time to say goodbye.

Comfort Innovations LLC designed the Caring Cradle to give mothers who experienced the unimaginable loss of their child, the privacy and time they deserve. Mothers want more time with their babies to hold, take photos and share time with family and friends. Saying goodbye shouldn't be rushed but at the same time hospital staff want to protect the mother from additional trauma due to potential deterioration of the baby's body. The Caring Cradle is a solution for both issues.

The Caring Cradle was manufactured specifically for the hospital environment, designed to be simple for both families and hospital staff to use. Simply bring the Caring Cradle bedside, plug it in and turn it on. The unit has a toggle on and off switch for ease of use with a gel mat inside the bassinet that cools while the unit is on. The gel mat swaddled with the infant allows families to hold their child with no attachments.

Today, with the gift of the Caring Cradle, there is no need to rush families or burden hospital staff with the uncomfortable task of separating the mother and baby. Since the Caring Cradle is a completely closed cooling system there is no need for nurses and hospital staff to monitor or add anything to the unit like distilled water or chemicals. The Caring Cradle is self-sufficient and can run continuously for days allowing the mother to spend uninterrupted time with her baby until discharge.

Why choose the Caring Cradle?

- **Completely self-contained** - no tubes, liquids or supervision needed
- **No Maintenance** - no replacement parts, routine care or hazardous chemicals
- **Simple to use** – plug it in and turn it on
- **Easy Training** - a simple 10-minute video
- **Minimizes staff stress** - ready to use and reliable
- **Designed to suit all needs** - available in 2 sizes for full term and premie loss

Currently we have units all over the US in over 600 hospitals in Hospital systems like HCA Healthcare, CommonSpirit, Ascension, NYP, Kaiser Permanente and many more.
