Simply experts for over 63 years

1962

Creation of the company called Limburgse Polyester Werkhuisen (LPW) and the development of the first Belgian one-piece pool in composite material.

1972

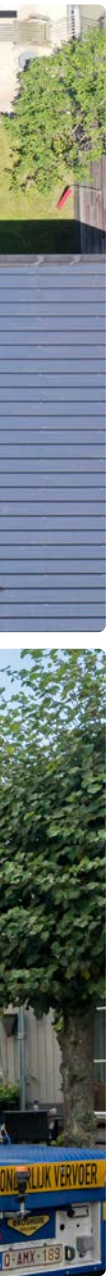

First implementation of a one-piece pool with integrated pool cover.

2003

Covrex® is the first international patented pool cover with full slats and flexible connections. In 2022, Covrex® joined T&A Group. (Technics & Applications).

2009

A network of certified partners come into force to improve quality and business growth.

2017

A fire rages in the production. LPW Pools seizes the opportunity to reinvent itself, a new range of models in full vinylester has been created (polyester-free).

2020

LPW Pools joins TSPH (The Swimming Pool Hub), a European industrial group active in the swimming pool sector,

2024

More than sixty years after its creation, LPW Pools is determined to strengthen its position with network expansion in Scandinavia, Germany and Austria.

2025

Expansion of production capacity and internationalisation through the acquisition of 3 production sites in France.

Swim as naturally as possible in a sustainable pool!

Sustainable water treatment 🌿 🗑️

Swim in healthy, clear, and soft water, thanks to the right filtration system. Possible filtration methods include UV disinfection, hydrolysis, or salt electrolysis.

An exceptionally long lifespan 🌿 ♻️

Our pools last a lifetime, 35 years of warranty.

City+, Basalt Grey

Our R&D department has developed BioFlow to improve the efficiency of biological filtration.

Optimised water circulation 🌿 📄

Frequency-controlled circulation pump that makes you save up to 65% of power.

BioFlow: The best option for 100% chlorine-free filtration.

Insulation 🌿 📄

Standard insulation of the shell with integration of honeycomb structure and optional Isofoam (PU foam). Full insulating slat Covrex®, or other covers that also reduce heat loss.

Favourable heating 🌿 🌊

- Opt for a full inverter variable-speed heat pump that saves up to 60% in energy costs.

- Opt for green energy using solar collectors.

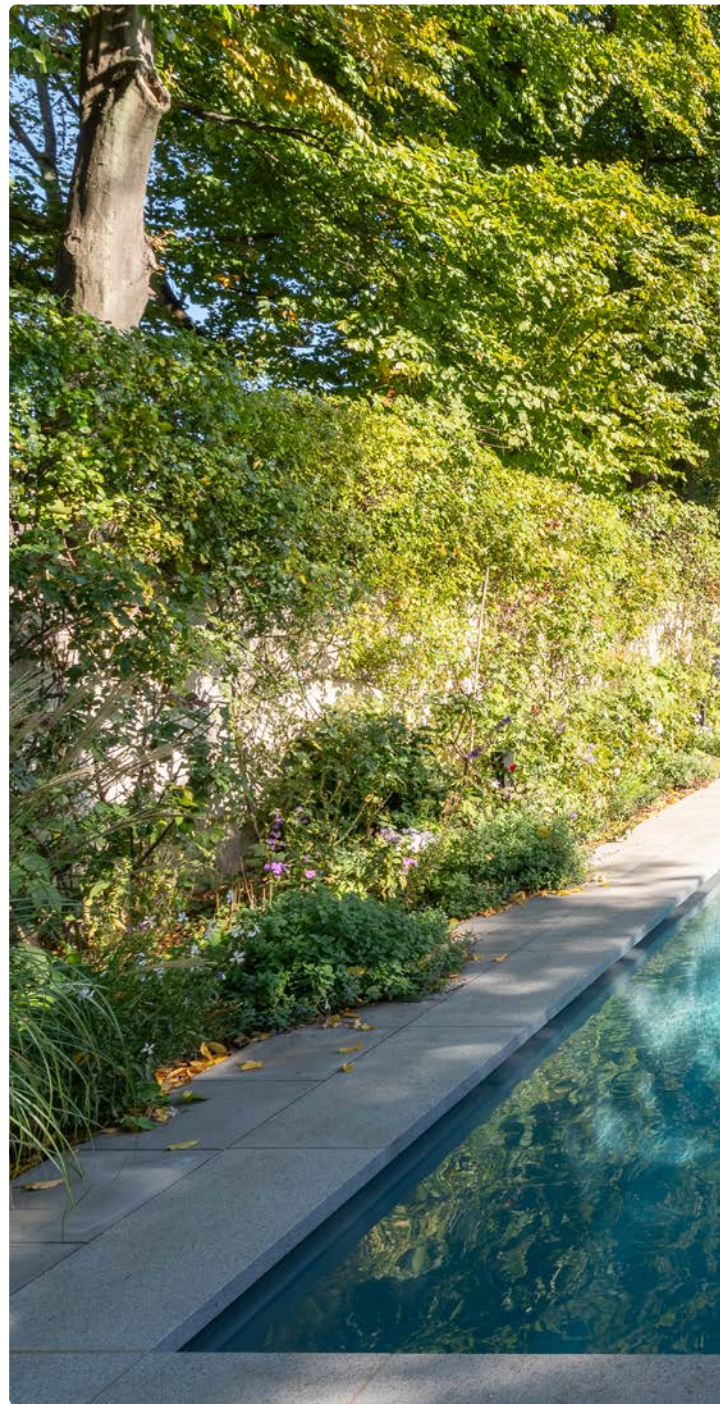

Minimal replacement of pool water 🌿 💧

One-piece pools in vinyl ester are very easy to maintain and thanks to a good filtration system, you never have to refresh your water.

Seamless pool made of vinylester resin: with lifetime warranty

As the words would suggest, a one-piece pool is manufactured as a single, complete pool shell that can be installed very quickly for both outdoor or indoor purposes. The manufacturing process is strictly controlled following a technical specification to ensure the highest quality result.

6 successive layers, including 4 in vinylester resin reinforced with glass fibre and a honeycomb structure 10 mm thick. The structure makes the whole self-supporting and offers a high insulation value. All our pools are 100% polyester-free and enjoy a 35 years guarantee on the watertightness of the shell and against osmosis.

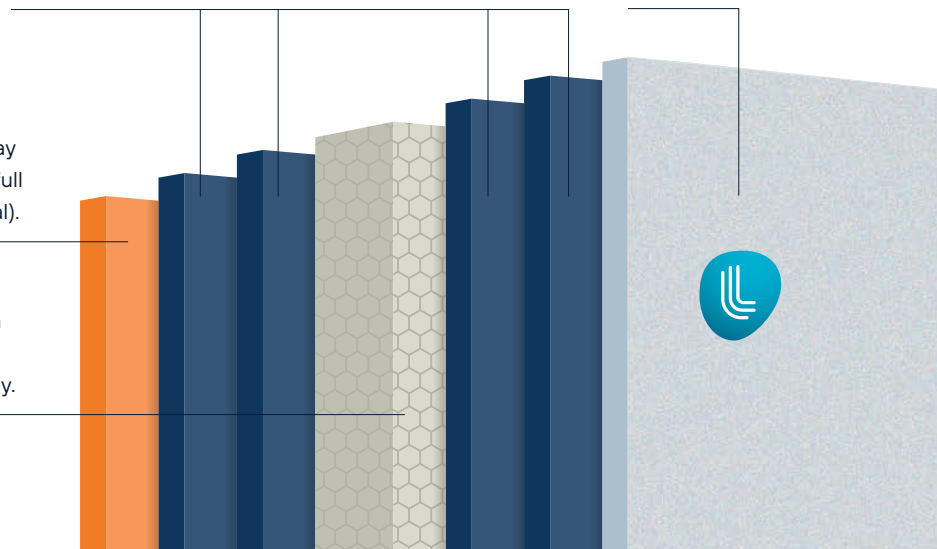

LPW Pools full vinylester swimming pool

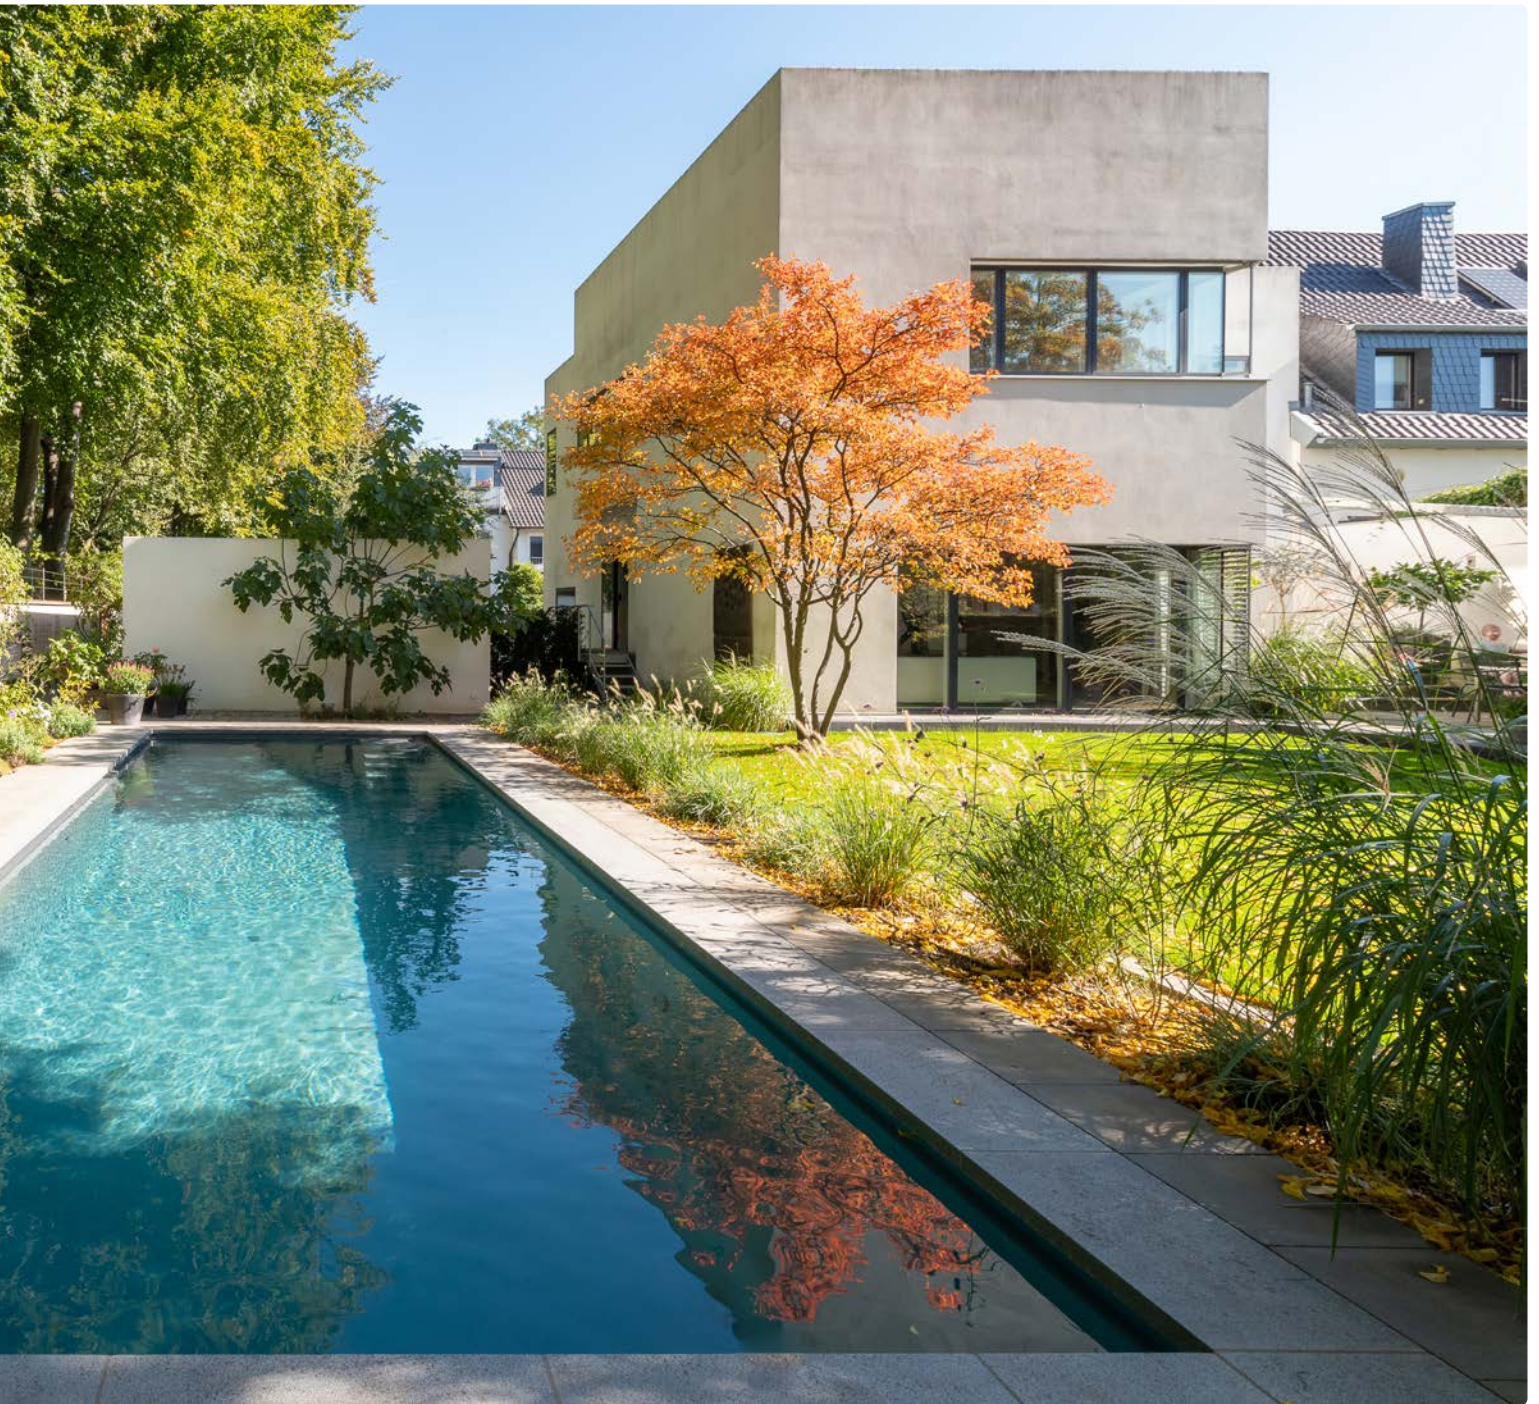

4 Vinyl ester layers help make the pool shell completely impermeable to water.

Gelcoat

The IsoFoam layer is a spray foam insulation providing full thermal insulation (optional).

The honeycomb insulation layer reduces heat loss and gives maximum solidity.

The swimming Pool

Discover the swimming pool in 3D!

1. **Drive system** with integrated high water level skimmers
2. **Integrated pool cover** tailor-made to the shape of your pool
3. The **security ledge** prevents the cover from tipping in the event of a fall. Both the pool as well as people and pets are protected.
4. **Coping stones** in granite or ceramic
5. **Multi-layer wall** (4 in vinyl ester) with a 10 mm insulating honeycomb structure (+ optional IsoFoam layer)
6. **Separating wall** between the cover and the swimming area providing a nice aesthetic finish.
7. **Cover pit** separated from the swimming area by a wall
8. **Cover pit tiles** in padouk wood or in any other material

The integrated high water level skimmers

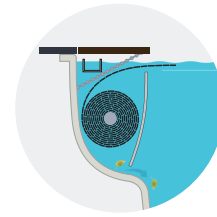

The double high water level skimmer is hidden under a decking, it purifies the large water surface removing floating debris and it also allows the water level to reach just below the coping stone. During the winter period there's no need to lower the water level.

Three cover systems

All LPW Pools swimming pools are equipped with an integrated automatic submerged cover, combining safety, comfort and aesthetics.

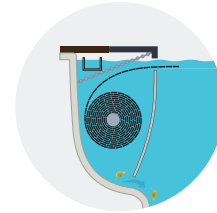

Depending on the selected model, your pool will be equipped with a Top Deck or Top Deck Light system. Certain models also offer the option of the new WaterDeck system: the cover is then positioned beneath a submerged lounge area, creating additional water surface.

These solutions are designed to integrate seamlessly into the overall design of your pool. Ask your pool specialist for advice to determine the best solution for your project.

Low maintenance

These one-piece pools have no seams, the walls are smooth which simplifies in maintenance. Microorganisms have little chance of adhering to the smooth walls, resulting in less need for chemical products to clean the swimming pool.

The range of LPW Pools

Our pools blend seamlessly into any environment.

LPW Pools offers you a wide range of models in various sizes. Whether you prefer a corner staircase, straight steps, Roman steps, or an underwater bench, the possibilities are endless.

Model	Dimensions (inner)	Water length	Depth	Cover pit	Integrated cover
Stark	5,30 m x 2,30 m	5,00 m / 5,30 m	1,40 m	0,50 m	✓ / -

All our swimming pools are available in 3 colors

Snow White

Cristal clear water with a lucidity emerging when the sun shines

Pearl Grey

A light grey colour, ensuring a sober discrete touch

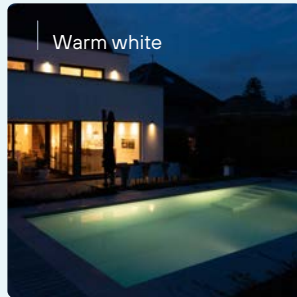

Basalt Grey

A natural look, fits perfectly in a garden with lots of vegetation

Ask your pool builder for the nearest showrooms or visit us at our Aarschot factory. You'll be able to see for yourself the different colors of our pools.

Cold white

Warm white

The underwater lights

Underwater lighting creates a unique atmosphere. LED spots offer a longer lifespan and they spread a bright pleasant light throughout the pool. Our pools come standard with cold or warm white LED. Coloured LED are optional.

Coping stones

The coping stones define the contours of the pool. Depending on the chosen pool model and the client's preferences, they are available with either a straight or rounded edge.

Deck finish

Make the right choice for the finish of your decking: in wood (padouk), composite or stone.

┌ Maintenance, isolation, the latest trends in swimming pools... All these topics (and more) on our blog: blog.lpw pools.com

Our swimming pool covers

LPW Pools collaborates with Belgian global player and manufacturer Technics & Applications (T&A Group) for all kinds of swimming pool covers. Through a modern, automated and strict production process, T&A Group manages to guarantee constant high quality.

Automatic pool covers: Covrex® slats

Covrex® foam filled slats made out of an assembly of co-extruded foam sections, and connected using a flexible joint for easy maintenance. These foam filled slats give the cover a solidity designed to resist extreme temperatures such as hail and frost. This patented cover offers the best thermal insulation.

The Covrex® slats come with 5 years warranty.

Choose the color of your pool cover that matches your chosen coping stones.

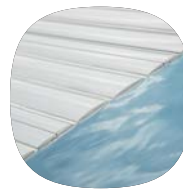

4 colors available:

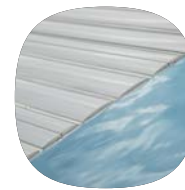

**Covrex®
Cream White**

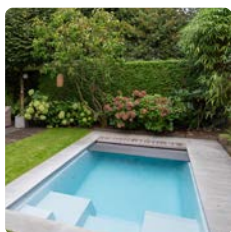

**Covrex®
Silex Grey**

**Covrex®
Pebble Grey**

**Covrex®
Steel Grey**

Automatic pool covers: Quadro solar slats

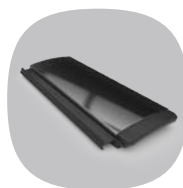

The Quadro is the first slat on the market to combine 4 advantages: anti-algae profile, anti-condensation mask with SIF technology (Selective Infrared Filter), optimal heating and an integrated anti-UV layer. These unique solar profiles in polycarbonate are patented and enjoy a stylish and exclusive appeal.

The Quadro slats come with 5 years warranty.

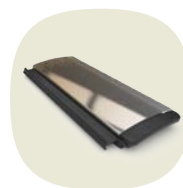

3 colors available:

**Quadro
Titanium**

**Quadro
Black**

**Quadro
Gold**

WaluDeck

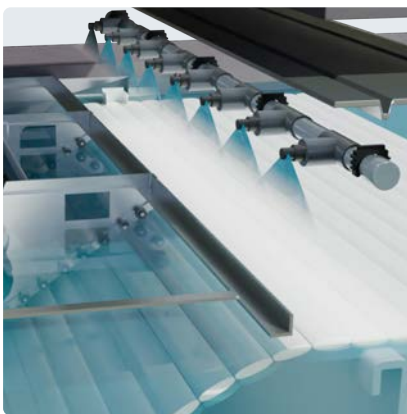

This mobile terrace serves as both a roof and a safety cover, ideal for use all year round! A smart aesthetic design with an integrated insulation membrane to prevent heat loss. All this in a height of only 20cm!

Basic or optional finishing possible with insulation panel and MOSO® bamboo wood, dark brown colour with matt finish.

Only compatible with City and Stark models

Scan the code to see the WaluDeck in action.

Coverwash

Coverwash automatically cleans the slats of your pool cover using high pressure. This keeps the cover clean and extends its lifespan. It uses pool water via the filtration system – an eco-friendly solution without waste.

Control and automate your pool

Choose from a range of different control boxes according to your needs. From basic functions to completely setting all the parameters of your pool, such as spotlights, cover, filtration system and anti-freeze function. Want to opt for total convenience? The PoolControl is available through a mobile application, perfectly manageable through your smartphone.

Pool accessories

Check with the Certified Partner to help you customize your pool further

Counter-current jet Xanas®

A powerful jet stream for swimming against the current. This is the ideal solution for turning your swimming pool into a sports area. The Xanas® has a movable outlet and you can adjust the intensity of the jet to your liking.

Counter-current tubine Hydrostar

The Hydrostar provides a natural experience. It generates a pleasant and powerful current that flows evenly around the body, without unpleasant splashing. Ideal for demanding endurance training.

We ensure quality by working with German suppliers Schmalenberger GmbH and Binder GmbH.

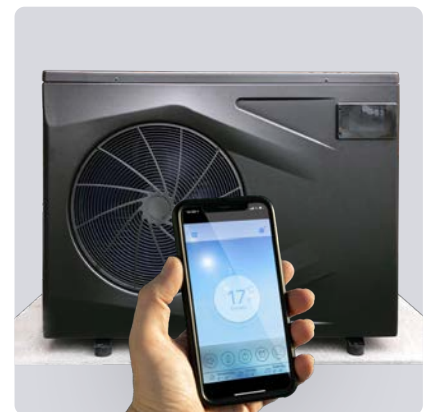

Stainless steel finish

Stainless steel fittings are offered to give a premium finish to the pool. These are 316L stainless steel masks for the spotlights, injectors and other accessories.

Heat pump

A quality heat pump is distinguished by its Full Inverter technology, this makes it possible to adjust the speed from 10% to 100% depending on the outside temperature and water temperature. Efficient, ecological, easy to use and very quiet. The ideal heat pump for anyone interesting in extending his/her swimming season.

Heat your pool at a lower cost thanks to solar panels.

IsoFoam

IsoFoam: reduce your electricity bill by more than 50%

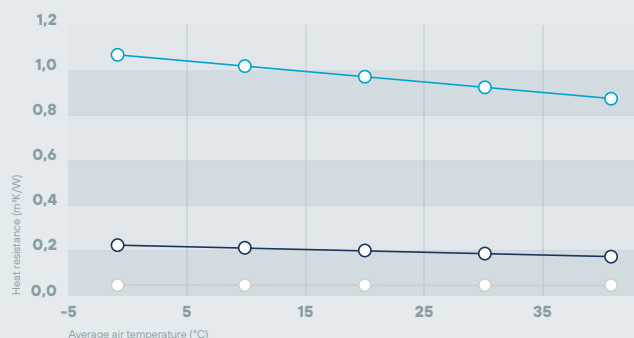

Considerable savings thanks to this fully-fledged insulation for your swimming pool. IsoFoam is polyurethane foam of 2cm thick, which is added to the walls of the pool.

The Certified Partner installs your pool

1. Preliminary visit

The pool builder foresees a visit to discuss your project: such as necessary permits, accessibility and if needed drainage. He provides you with a concrete image of your future pool, for example through augmented reality.

2. The ground and stabilization

Before placing the pool shell and making the technical connections, the ground is excavated. The site must be easily accessible and free of stones. If necessary, a telescopic crane will be used.

3. Technical unit

The installation includes a pump, filter, piping, and valves. Automatic water treatment is possible. Only the heat pump is installed outside.

4. Finishing

The final step is to install the pool cover and coping stones. The pool builder then carefully explains how installation works and how best to maintain it throughout the year.

The LPW Pools warranty

Since 1962, we have been relying on the quality of our pools to be able to offer unique warranties to our customers. Every proud owner of a pool from LPW Pools receives a **personalized warranty certificate**. LPW Pools only selects raw materials from trusted suppliers who also offer impeccable service.

35 years warranty

on **pool shell sealing** and
against blistering

5 years warranty

on all the slats. The Covrex®
warranty also includes damage
caused by hail.

4 years warranty

on the **cover motors**

2 years warranty

on **electrical installations** and
accessories

94% of our customers recommend LPW Pools

LPW Pools is constantly striving for improvement and therefore regularly conducts customer satisfaction surveys. Independent research shows that no less than 94% of LPW Pools owners are not only satisfied with their purchase but also enthusiastically recommend it to friends and family. And this has been the case consistently since we began measuring in 2018.

Would you recommend a pool from LPW Pools to friends and family?

Can you indicate your overall satisfaction with your pool on a scale of 1 to 10 (average)

Can you grade the quality of the pool?

LPW Pools Certified Partner evaluation

Explanation given during the sales talk

Availability of the pool builder

In compliance with the initial budget

Details and finishing of the works

Explanation given by the end of the works

The results relate to more than 1000 responses of customers whose pool was placed in the last 6 years in Belgium. The survey was conducted by Incidence. Incidence is a research agency that offers solutions for small and medium-sized enterprises. Both within profit and non-profit sectors. As a member of the international network Esomar, Incidence commits to respecting the ethical codes and rules within the sector.

I hereby confirm that all the above results are reliable, and have not been edited by LPW Pools or any other party.

— Geoffroy Comhaire, CEO Incidence Market Research

The TSPH family

LPW Pools is part of the TSPH family (The Swimming Pool Hub), a close-knit group of family businesses within the swimming pool sector. Together with Flexline and Aboral Piscines, TSPH forms a strong and reliable business group with three own production sites in France and Belgium.

Within this warm family spirit, LPW Pools also works with a network of Certified Partners: dedicated pool builders trained by LPW Pools with years of experience in installing and maintaining one-piece pools. Each of them takes the time to help you choose the pool that best suits your wishes and needs, offering honest advice and clear information.

Their many completed projects reflect their craftsmanship and commitment. You are always welcome in their showroom or at the LPW Pools showroom in Aarschot, where you can peacefully discover your dream pool.

Specialised after-sales service

Our certified pool builders receive regular training updates so that they can provide you with the latest and best service.

Don't forget your swimwear as you will be able to try out our swimming pools!

Lifetime warranty

LPW Pools offers exceptionally long warranties¹. Lifetime warranty on the water tightness of the pool shell and against blistering. LPW Pools chooses for 100% vinyl ester material.

Belgian know-how

Since 1962, our swimming pools are been designed in Belgium. Through our network, we install more than 1,000 swimming pools every year. An invaluable experience you can count on.

Proximity

LPW Pools has developed a network of certified partners in Belgium and other countries to provide a service both efficient and fast, including after sale service.

Energy savings

Considerable energy savings can be made due to the honeycomb structure and the Covrex® cover. Savings are even greater when combined with a heat pump and the addition of the Isofoam layer.

Safety

The safety and reliability of the Covrex® Classic pool covers offer a significant advantage. When the pool is closed there's no risk of falling in the water!

Aesthetics and finish

A high waterline due to the high water level skimmer. There are no visible and unsightly skimmers.

Designed for easy maintenance

Thanks to smooth walls and rounded corners, a robot can clean the pool quickly and efficiently. The safety ledge and the cover pit ensure a great circulation of water reducing the build up of debris.

Quick installation

One-piece pools are produced at the factory which allows a very quick installation. Less than 1 week time, from the first excavation work to being able to enjoy your first dive.

Respect for nature

As a manufacturer, we like to do our bit for Mother Nature. Our sustainable swimming pools offer the highest insulation value that can be combined with purified water.

Customer satisfaction

LPW Pools conducts regularly a survey² in Belgium, to assess the overall satisfaction regarding quality and the service of our partners.
