

The True Cost of Waiting for Equipment to Fail

How an MCFT contract helps protect your assets, budget and operation.

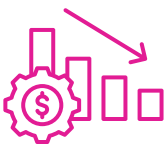

Relying on reactive maintenance can be expensive, its usually happens at the worst time. The cost can be more than just the repair - including downtime, service disruption, brand damage, wasted stock or asset replacement.

MCFT Preventative Maintenance, helps you move from rective firefighting to planned asset care, allowing you to plan costs and reduce downtime.

Cost Comparison

Example Asset Register			Without an MCFT PPM Contract		With an MCFT PPM Contract	
✓	Dishwashers	22	Reactive Callouts	£14,000	Maintenance Visits	£12,000
✓	Ovens	6	Emergency labour and parts	£7,500	Reactive Callouts	£6,000
✓	Coldrooms	8	Remedial Works	£24,000	Remedial Works	£20,000
✓	Fridges	61	Unplanned Replacement	£12,000	Planned Replacements	£10,000
✓	Ice Machines	3				
Total assets on site		100	Estimated total cost: £57,500		Estimated total cost: £48,000	

Potential annual savings: £9,500

Illustrative example - approx 16% lower annual maintenance and replacement costs.
