

OPEN POSITIONS

CAET certification required. Military avionics experience accepted in lieu of the civilian Part 145 experience.

Avionics Install Technician

SkyWorld Aviation, Inc, Midland, VA 22728 (38.59342,-77.71356)

Military Avionics Experience Accepted

If you maintained avionics systems in the military—whether on fighters, transports, helicopters, or any other platform—your experience counts here. We're a Part 145 repair station serving general and business aviation, and we need technicians who can troubleshoot, install, and maintain avionics systems. The civilian equipment brands are different, but the skills are the same.

What You'll Do

- Install avionics equipment in aircraft ranging from Cessnas to Citations
- Fabricate wire harnesses and route cabling according to installation drawings
- Troubleshoot integration issues when systems don't talk to each other
- Perform functional tests and work with inspectors to sign off completed work
- Work directly on aircraft in our hangar—this is hands-on work, not desk work

What We're Looking For

- Military avionics experience (any platform) OR 2+ years civilian avionics experience
- CAET certification required within 180 days of hire (we'll cover the cost)
- Ability to read wiring diagrams and installation drawings
- Wire termination and harness fabrication skills
- Attention to detail on documentation

Compensation & Benefits

- Starting pay: \$30.00-\$45.00/hour based on experience
- Health, dental, and vision insurance
- 401(k) with company match

- Paid time off
- CAET certification paid by company
- Ongoing training on civilian equipment

Why This Job

You'll work on a variety of aircraft instead of one platform. You'll go home every night. No deployments. You pick where you live. And if you're good, you'll advance quickly—this industry rewards performance, not just seniority.
